part of the dramaturgy rather than a reflection of an individual performer's taste or status. She argues that in the period 1820-1920, as part of the larger project of modernism across the artistic and cultural field, the functions of "clothing" and "costume" diverged. Onstage apparel took on a more

specific semiotic task, acting as a fresh channel for the flow of information between the performer, the literary text, and the spectator. Modernizing Costume Design traces how five kinds of artists - directors, performers, writers, couturiers, and painters - made key contributions to

this new model of costume design. Holt shows that by 1920, costume design shifted in status from craft to art.

Hatchet has also been nominated as one of America's best-loved novels by PBS's The Great American Read. Thirteen-year-old Brian Robeson, haunted by his secret knowledge of his mother's infidelity, is traveling by single-engine plane to visit his father for the first time since the divorce. When the plane crashes, killing the pilot, the sole survivor is Brian. He is alone in the Canadian wilderness with nothing but his clothing, a tattered windbreaker, and the hatchet	his mother had given him as a present. At first consumed by despair and self-pity, Brian slowly learns survival skills—how to make a shelter for himself, how to hunt and fish and forage for food, how to make a fire—and even finds the courage to start over from scratch when a tornado ravages his campsite. When Brian is finally rescued after fifty-four days in the wild, he emerges from his ordeal with new patience and maturity, and a greater understanding of himself and his parents. <u>The Things They Carried</u> Routledge Biology is where many of science's most exciting and	relevant advances are taking place. Yet, many students leave school without having learned basic biology principles, and few are excited enough to continue in the sciences. Why is biology education failing? How can reform be accomplished? This book presents information and expert views from curriculum developers, teachers, and others, offering suggestions about major issues in biology education: what should we teach in biology and how should it be taught? How can we measure results? How should teachers be educated and certified? What obstacles are blocking reform?

The #1 New York Times  
bestseller that has all  
America talking—with a  
new afterword on  
expanding your range—as

Joe, CBS This Morning,  
and more. "The most  
important business—and  
parenting—book of the

Plenty of experts argue  
that anyone who wants to  
develop a skill, play an  
instrument, or lead their  
field should start early,  
focus intensely, and rack  
up as many hours of  
deliberate practice as  
possible. If you dabble or  
delay, you'll never catch

up to the people who got a  
head start. But a closer  
look at research on the  
world's top performers,  
from professional athletes  
to Nobel laureates, shows  
that early specialization is  
the exception, not the rule.  
David Epstein examined  
the world's most  
successful athletes,  
artists, musicians,  
inventors, forecasters and  
scientists. He discovered  
that in most  
fields—especially those that  
are complex and  
unpredictable—generalists,

---

not specialists, are primed to excel. Generalists often find their path late, and they juggle many interests rather than focusing on one. They're also more creative, more agile, and able to make connections their more specialized peers can't see.

Provocative, rigorous, and engrossing, *Range* makes a compelling case for actively cultivating inefficiency. Failing a test is the best way to learn. Frequent quitters end up with the most fulfilling

careers. The most impactful inventors cross domains rather than deepening their knowledge in a single area. As experts silo themselves further while computers master more of the skills once reserved for highly focused humans, people who think broadly and embrace diverse experiences and perspectives will increasingly thrive.

**Roll of Thunder, Hear My Cry** Holt Rinehart & Winston

A classic work of American literature that has not stopped changing minds and lives since it burst onto the literary scene, *The Things They Carried* is a ground-breaking meditation on war, memory, imagination, and the redemptive power of storytelling. *The Things They Carried* depicts the men of Alpha Company: Jimmy Cross, Henry Dobbins, Rat Kiley, Mitchell Sanders, Norman Bowker, Kiowa, and the character Tim O'Brien,

---

who has survived his tour in Vietnam to become a father and writer at the age of forty-three. Taught everywhere—from high school classrooms to graduate seminars in creative writing—it has become required reading for any American and continues to challenge readers in their perceptions of fact and fiction, war and peace, courage and fear and longing. The Things They Carried won France's prestigious Prix du

Meilleur Livre Etranger and the Chicago Tribune Heartland Prize; it was also a finalist for the Pulitzer Prize and the National Book Critics Circle Award.
