Does your classroom run the  
way you want? Most people  
enter the teaching profession  
wanting to make a difference  
in young people's lives.  
However, more and more  
teachers feel lost,

frustrated, and overwhelmed  
with everything they're  
required to do. It's hard to  
be successful without a clear  
plan on getting control of  
your classroom, empowering  
your students, and making the  
learning experience more  
enjoyable for you and your  
students. These 18 chapters  
are crucial for any educator  
who wants to take their  
teaching to the next level.  
Teacher, Principal, Director,  
Dean, and YouTube/TikTok  
teacher, Tyler Tarver knows  
that education is more than  
just standing in front of  
students lecturing them on a  
specific topic - it's a  
culture of learning that  
educators foster to train the  
next generation. If you are  
attempting to be the best  
educator you can in the  
environment you're in, you  
need ideas and encouragement  
from someone who's been  
exactly where you are. Even if  
you had the time, money, and  
support we know teachers  
deserve, we know that applying  
any knowledge always has a  
greater impact when you're  
able to give personal and  
practical application to the  
ideas you know matter. Besides  
sitting through 60+ hours a  
year of professional  
development, there is another  
way to incrementally improve  
your teaching week after week.

---

Spoiler Alert: It can also be fun. Tyler Tarver learned how to create the culture he wanted in his classroom. He was able to pass this on to any educator who wanted to get excited about teaching and have a deeper impact on their students. He wrote *The Baller Teacher Playbook* to teach others what it takes to expand your teaching and create a community of happy and engaged learners. These short, weekly chapters and accompanying resources will add enormous value to your classroom and the school you work for. In this 18-week guide, readers will be introduced to the top areas where truly successful teachers and their students excel:

- Reason vs Excuses: How do you overcome the hurdles inherent in education?
- Fun: How do you get yourself and students excited about learning?
- Creativity: How do you create a culture where every day is unexpected but not chaotic?
- Positivity: How can we roll with the punches but not have to fake it?
- Authenticity: How can I be myself but genuinely connect with young people?
- Leadership: How do I get my students to lead without me?
- Collaboration: How do I work with my administrators, colleagues, and parents to better every student's education?

Diversity: How do I help build empathy and understanding among myself and my students?

Development: How am I always getting better?

Plus more! *The Baller Teacher Playbook* is the must-have guide for anyone who feels lost or overwhelmed by the current educational climate, even if they have been teaching for years. Learn from a fellow educator who had their fair share of mistakes and successes through the simple but effective tactics shared in these pages. Take things further: If you want to move forward even faster as an educational professional, read a chapter once a week with your team, and come together at weekly meetings to discuss experience, ideas, triumphs, and a community of educators trying to improve themselves and their classroom.

The Common core state standards for mathematics are a set of expectations and skills that students need to master to succeed in college and the real world. BarCharts' Math Common core series aligns with those specific standards to help guide students through their classes. Each guide in the series features real-world problems and examples, illustrations, and tables to help students retain information. This laminated quick study guide includes the number system, exponents, radicals, functions, linear equations, transformations,

Discovering Geometry is designed  
so that you can be actively  
engaged as you learn geometry. In  
this book you learn by doing. You  
will learn to use the tools of  
geometry and to perform geometry  
investigations with them. Many of  
the investigations are carried out  
in small cooperative groups in  
which you jointly plan and find  
solutions with other students.  
Your investigations will lead you  
to the discovery of geometry  
properties. In addition, you will  
gradually learn about proof, a  
form of reasoning that will help  
you explain why your discoveries  
are true, through developing proof  
group activities and exercises. -  
p. xiv.

The main objective of this Research Topic is to determine the conditions that place students at risk of school failure, identifying student and context variables. In spite of the fact that there is currently little doubt about how one learns and how to teach, in some countries of the "developed world," there is still there is a high rate of school failure. Although the term "school failure" is a very complex construct, insofar as its causes, consequences, and development, from the field of educational psychology, the construct "student engagement" has recently gained special interest in an attempt to deal with the serious problem of school failure. School engagement builds on the anatomy of the students' involvement in school and describes their feelings, behaviors, and thoughts about their school

---

experiences. So, engagement is learning difficulties, an important component of students' school experience, with a close relationship to achievement and school failure. Children who self-set academic goals, attend school regularly and on time, behave well in class, complete their homework, and study at home are likely to interact adequately with the school social and physical environments and perform well in school. In contrast, children who miss school are more likely to display disruptive behaviors in class, miss homework frequently, exhibit violent behaviors on the playground, fail subjects, be retained and, if the behaviors persist, quit school. Moreover, engagement should also be considered as an important school outcome, eliciting more or less supportive reactions from educators. For example, children who display school-engaged behaviors are likely to receive motivational and instructional support from their teachers. The opposite may also be true. But what makes student engage more or less? The relevant literature indicates that personal variables (e.g., sensory, motor, neurodevelopmental, cognitive, motivational, emotional, behavior problems, addictions), social and/or cultural variables (e.g., negative family conditions, child abuse, cultural deprivation, ethnic conditions, immigration), or school variables (e.g., coexistence at school, bullying, cyberbullying) may concurrently hinder engagement, preventing the student from acquiring the learnings in the same conditions as the rest of the classmates.
