The content of Algebra 1 is organized around families of
functions, with special emphasis on linear and quadratic
functions. As you study each family of functions, you will
learn to represent them in multiple ways -- as verbal
descriptions, equations, tables, and graphs. You will also
learn to model real-world situations using functions in order
to solve problems arising from those situations. In addition to
its algebra content, Algebra 1 includes lessons on probability
and data analysis as well as numerous examples and
exercises involving geometry. - p. [SC2].
