The content of Algebra 1 is organized around families of functions, with special emphasis on linear and quadratic functions. As you study each family of functions, you will learn to represent them in multiple ways -- as verbal descriptions, equations, tables, and graphs. You will also learn to model real-world situations using functions in order to solve problems arising from those situations. In addition to its algebra content, Algebra 1 includes lessons on probability and data analysis as well as numerous examples and exercises involving geometry. - p. [SC2].

Algebra 2, Grades 9-12 Holt McDougal

Expressions, equations, and functions -- Properties of real numbers -- Solving linear equations -- Graphing linear equations and functions -- Writing linear equations -- Solving and graphing linear inequalities -- Systems of equations and inequalities -- Exponents and exponential functions -- Polynomials and factoring -- Quadratic equations and functions -- Radicals and geometry connections -- Rational equations and functions -- Probability and data analysis.
