The content of Algebra 1 is organized around families of functions,
with special emphasis on linear and quadratic functions. As you study
each family of functions, you will learn to represent them in multiple
ways -- as verbal descriptions, equations, tables, and graphs. You will

also learn to model real-world situations using functions in order to solve problems arising from those situations. In addition to its algebra content, Algebra 1 includes lessons on probability and data analysis as well as numerous examples and exercises involving geometry. - p. [SC2].
