World history has expanded dramatically in recent years, primarily as a teaching field, and increasingly as a research field. Growing numbers of teachers and Ph.Ds in history are required to teach the subject. They must be current on topics from human evolution to industrial development in Song-dynasty China to today's disease patterns - and then link these disparate topics into a coherent course. Numerous textbooks in print and in preparation summarize the field of world history at an introductory level. But good teaching also requires advanced training for teachers, and access to a stream of new research from scholars trained as world historians. In this book, Patrick Manning provides the first comprehensive overview of the academic field of world history. He reviews patterns of research and debate, and proposes guidelines for study by teachers and by researchers in world history.

Sanctified Violence Holt McDougal

Women in World History brings together the most recent scholarship in women's and world history in a single volume covering the period from 1450 to the present, enabling readers to understand women's relationship to world developments over the past five hundred years. Women have served the world as unfree people, often forced to migrate as slaves, trafficked sex workers, and indentured laborers working off debts. Diseases have migrated through women's bodies and women themselves have deliberately spread religious belief and fervor as well as ideas. They have been global authors, soldiers, and astronauts encircling the globe and moving far beyond it. They have written classics in political and social thought and crafted literary and artistic works alongside others who were revolutionaries and reform-minded activists. Historical scholarship has shown that there is virtually no part of the world where women's presence is not manifest, whether in archives, oral testimonials, personal papers, the material record, evidence of disease and famine, myth and religious teachings, and myriad other forms of documentation. As these studies mount, the idea of surveying women's past on a global basis becomes daunting. This book aims to redress this situation and offer a synthetic world history of women in modern times.

These provocative chapters will promote lively discussions among readers while deepening their understanding of African and world history. The book is strengthened by its incorporation of actors and issues representing the African diaspora and African Americans in particular." —Rebecca Shumway, College of Charleston

The Washington Post Notable Non-Fiction of 2013 “I can imagine few more enjoyable ways of thinking than to read this book.”—Sarah Bakewell, New York Times Book Review, front-page review Tackling the “darkest question in all of philosophy” with “raffish erudition” (Dwight Garner, New York Times), author Jim Holt explores the greatest metaphysical mystery of all: why is there something rather than nothing? This runaway bestseller, which has captured the imagination of critics and the public alike, traces our latest efforts to grasp the origins of the universe. Holt adopts the role of cosmological detective, traveling the globe to interview a host of celebrated scientists, philosophers, and writers, “testing the contentions of one against the theories of the other” (Jeremy Bernstein, Wall Street Journal). As he interrogates his list of ontological culprits, the brilliant yet slyly humorous Holt contends that we might have been too narrow in limiting our suspects to God versus the Big Bang. This “deft and consuming” (David Ulin, Los Angeles Times) narrative humanizes the profound questions of meaning and existence it confronts.

World History, a Story of Progress McDougal Littell/Houghton Mifflin

In an age of unprecedented corporate and political control over life inside of educational institutions, this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K-16 schools to perpetuate their interests at the expense of minoritized social groups. The contributors provide a comprehensive examination of how textbooks, the most dominant cultural force in which corporations and political leaders impact the schooling curricula, shape students’ thoughts and behavior, perpetuate power in dominant groups, and trivialize social groups who are oppressed on the structural axes of race, class, gender, sexuality, and (dis)ability. Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism, militarism, consumerism, White supremacy, heterosexism, rugged individualism, technology, and a positivistic conception of the world. Finally, the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other, to reflect upon the constitutive forces causing oppression in schools and in the wider society, and to reflect upon how to challenge corporate and political dominance over knowledge production.
