Born in 1927 to daringly enterprising parents in the Deep South, Coretta Scott had always felt called to a special purpose. While enrolled as one of the first black scholarship students recruited to Antioch College, she became politically and socially active and committed to the peace movement. As a graduate student at the New England Conservatory of Music, determined to pursue her own career as a concert singer, she met Martin Luther King Jr., a Baptist minister insistent that his wife stay home with the children. But in love and devoted to shared Christian beliefs as well as shared racial and economic justice goals, she married Dr. King, and events promptly thrust her into a maelstrom of

history throughout which she was a strategic partner, a standard bearer, and so much more. As a widow and single mother of four, she worked tirelessly to found and develop The King Center as a citadel for world peace, lobbied for fifteen years for the US national holiday in honor of her husband, championed for women's, workers' and gay rights and was a powerful international voice for nonviolence, freedom and human dignity.

Printed in color. U.S. History is designed to meet the scope and sequence requirements of most introductory courses. The text provides a balanced approach to U.S. history, considering the people, events, and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived

---

experience). U.S. History covers key forces that form the American experience, with particular attention to issues of race, class, and gender.

What remains of a great sporting spectacle after the last race is run or the final match is played? How can the vast expense of mounting such events be justified? What if there is nothing left behind or what if the legacy is negative, a costly infrastructure which is unused or a debt-ridden host city? The Routledge Handbook of Sport and Legacy addresses perhaps the most important issue in the hosting of major contemporary sporting events: the problem of 'legacy'. It offers a rigorous, innovative and comparative insight into this contested concept from interdisciplinary and practical perspectives. Major events must now have a conscious, credible and defined policy for legacy to meet public expectations. The book provides a comprehensive survey of the various kinds of legacy that can be delivered, as well as a close examination of the potential benefits and practical challenges involved in each. From 'hard' legacies, such as stadia and infrastructure, to 'soft' legacies including skill development, attitude change and capacity building, the book offers both a historical case study and an innovative strategic management approach, and establishes the limits of

what can realistically be achieved in terms of economic, social, cultural, physical and sporting development. The Routledge Handbook of Sport and Legacy includes contributions from world leading scholars and practitioners and features detailed case studies of major sports events from around the world, including the FIFA World Cup and ten Olympics Games from London in 1908 to London 2012. It is invaluable reading for students and researchers working in sport studies, events management, human geography, economics or planning, and an essential reference for any professional engaged in delivering legacy through sport. NY Te Hwh Holt Rinehart & Winston ONE OF THE NEW YORK TIMES BOOK REVIEW'S 10 BEST BOOKS OF THE YEAR A major book about the future of the world, blending intellectual and natural history and field reporting into a powerful account of the mass extinction unfolding before our eyes Over the last half a billion years, there have been five mass extinctions, when the diversity of life on earth suddenly and dramatically contracted. Scientists around the world are currently monitoring the sixth extinction, predicted to be the most devastating extinction event since the asteroid impact that wiped out the dinosaurs. This time around, the cataclysm is us. In The Sixth Extinction, two-time winner of the National Magazine Award and New Yorker writer Elizabeth Kolbert draws on the work of scores of researchers in half a dozen disciplines, accompanying many of them into the field: geologists who study deep ocean cores, botanists who follow the tree line as it climbs up the Andes, marine biologists who dive off the Great Barrier Reef. She introduces us to a dozen species, some already gone, others facing extinction, including the Panamanian golden frog, staghorn coral, the great auk, and the

---

Sumatran rhino. Through these stories, Kolbert provides a moving account of the disappearances occurring all around us and traces the evolution of extinction as concept, from its first articulation by Georges Cuvier in revolutionary Paris up through the present day. The sixth extinction is likely to be mankind's most lasting legacy; as Kolbert observes, it compels us to rethink the fundamental question of what it means to be human. *Routledge Handbook of Sport and Legacy* Henry Holt and Company

A look at how to teach history in the age of easily accessible—but not always reliable—information. Let's start with two truths about our era that are so inescapable as to have become clichés: We are surrounded by more readily available information than ever before. And a huge percent of it is inaccurate. Some of the bad info is well-meaning but ignorant. Some of it is deliberately deceptive. All of it is pernicious. With the Internet at our fingertips, what's a teacher of history to do? In *Why Learn History (When It's Already on Your Phone)*, professor Sam Wineburg has the answers, beginning with this: We can't stick to the same old read-the-chapter-answer-the-question snoozefest. If we want to educate citizens who can separate fact from fake, we have to equip them with new tools. Historical thinking, Wineburg shows, has nothing to do with the ability to memorize facts. Instead, it's an orientation to the world that cultivates reasoned skepticism and counters our tendency to confirm our biases. Wineburg lays out a

mine-filled landscape, but one that with care, attention, and awareness, we can learn to navigate. The future of the past may rest on our screens. But its fate rests in our hands.

*Praise for Why Learn History (When It's Already on Your Phone)*

“ If every K-12 teacher of history and social studies read just three chapters of this book— ” *Crazy for History*, ” “ *Changing History . . . One Classroom at a Time*, ” and “ *Why Google Can't Save Us* ” —the ensuing transformation of our populace would save our democracy. ” —James W. Lowen, author of *Lies My Teacher Told Me* and *Teaching What Really Happened*

“ A sobering and urgent report from the leading expert on how American history is taught in the nation's schools. . . . A bracing, edifying, and vital book. ” —Jill Lepore, *New Yorker* staff writer and author of *These Truths*

“ Wineburg is a true innovator who has thought more deeply about the relevance of history to the Internet—and vice versa—than any other scholar I know. Anyone interested in the uses and abuses of history today has a duty to read this book. ” —Niall Ferguson, senior fellow, Hoover Institution, and author of *The Ascent of Money* and *Civilization*
