Home Health Aide Coordinator Jones & Bartlett Learning

Effective documentation demonstrates that care was coordinated between team members involved in the plan of care, it supports the payment the agency receives for providing home health services to the patient, and it serves as legal proof that a visit was made. Poor documentation can result in costly survey citations and lost revenue for the agency. It can also lead to medical errors that can be life-threatening to patients and career-ending for clinicians. This lesson focuses on requirements and guidelines for accurate and complete electronic and handwritten home health aide documentation. **LESSON OBJECTIVES** After completion of this program, the home health aide will be able to: Identify five documentation flaws that could lead to legal or survey issues Distinguish between objective and subjective documentation Describe how to correct a documentation error in the medical record Contents of this lesson: A clearly written fact sheet A 10-question post-test to measure understanding of the subject matter An answer sheet with a place for the instructor's comments and signature An illustrative, homecare-specific case study Suggested supplemental learning activities An attendance log and certificate of completion

This Protocol delineates the evidence for using devices for noninvasive patient monitoring of blood pressure, heart rhythms, pulse oximetry, end-tidal carbon dioxide, and respiratory

waveforms. These protocols guide clinicians in the appropriate selection of patients for use of the device, application of the device, initial and ongoing monitoring, device removal, and selected aspects of quality control.

Home health aides must meet the Centers for Medicare & Medicaid Services' (CMS) annual requirement to complete 12 hours of in-service training. Deliver the relevant education your aides need to satisfy this requirement with HCPro's Home Health Aide On-the-Go In-service Series, Volume 15. This new edition is filled with 12 informative, one-hour in-service training lessons addressing timely topics that are crucial to homecare. Home Health Aide On-the-Go In-service Series, Volume 15, also provides authoritative, comprehensive, yet easy-to-understand training lessons for group classroom settings or self-study. The in-services offer home health aides the convenience and flexibility to study when time permits and to learn at their own pace. The lessons include both clinical topics, such as avoiding UTIs and colostomy care, and staff training topics, such as ethics and a basic understanding of Medicare and OASIS-C1. With this resource, agencies will be able to: Help home health aides fulfill CMS' annual mandate to complete 12 hours of in-service training with condensed, practical lessons that focus specifically on their role and needs Easily prepare an in-service training program for the entire calendar year without having to coordinate staff schedules for on-site training Copy lessons, attendance logs, and customizable certificates of completion for each participant through single-site reproduction rights Each lesson includes new and updated content, including: One hour of study, including a concisely written fact sheet, explaining an important homecare-specific topic A descriptive homecare-specific case study Supplemental learning activities A 10-question posttest to measure aides' understanding and validate their

comprehension of the subject matter An attendance log and certificate of completion to document staff training hours [Home Health Aide Training](#) Elsevier Health Sciences
