ABOUT THIS BOOK This book is written by an insider. A hospital administrator and practitioner who participated firsthand in laying the foundation for today's collapsing health care system. A practitioner who then went on to make radical changes in the way he practiced his profession and his philosophy of health care delivery. A practitioner who is now hell-bent on making radical changes in this disastrous health care system he helped to create 30 years ago. This book is an insider's look at the sequence of events and decisions that led to the demise of our health care system. This book is designed to educate you to:

Smart homes, home automation and ambient-assisted living are terms used to describe technological systems that enrich our living environment and provide means to support care, facilitate well-being and improve comfort. This handbook provides an overview of the domain from the perspective of health care and technology. In Part 1, we set out to describe the demographic changes in society, including ageing and diseases and impairments which lead to the needs for technological solutions. In Part 2, we describe the technological solutions, ranging from sensor-based networks, components, to communication protocols that are used in the design of smart homes. We also deal with biomedical features which can be measured and services that can be delivered to end-users as well as the use of social robots. In Part 3, we present best practices in the field. These best practices mainly focus on existing projects in Europe, the USA and Asia, in which people receive help through dedicated technological solutions being part of the continuum of the home environment and care.

The absence of universal health insurance coverage in the United States of America has been debated for years without many solutions being proposed. Barry G. Hoerig, a registered nurse and certified case manager, explains how Medicare for all would solve our problems in this thought-provoking book. He also reveals how politicians continue to work against a solution that could transform our health care system. As you read, you'll get answers to questions such as: • How does the American health care system go against the tenets of capitalism? • How are people without insurance treated differently than those with insurance? • How can American health care offer consumers more choices? Paving the way for Medicare for all makes sense but it won't come at a cost: Yes, Americans will have to pay more taxes, but it will also result in a reciprocal reduction of taxes and health care premiums elsewhere. It's imperative, however, that Medicare for all be cost effective and fair. Moreover, it must temper the negative aspects of capitalism while avoiding the awful results of socialism. Get detailed insights on how to improve health care for everyone with the insights in Affordable Medicare for All.

"Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need to know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)."--Online AHRQ blurb, <http://www.ahrq.gov/qual/nursesdbk>.
