ABOUT THIS BOOK This book is

written by an insider. A hospital administrator and practitioner who participated firsthand in laying the foundation for today's collapsing health care system. A practitioner who then went on to make radical changes in the way he practiced his profession and his philosophy of health care delivery. A practitioner who is now hell-bent on making radical changes in this disastrous health care system he helped to create 30 years ago. This book is an insider's look at the sequence of events and decisions that led to the demise of our health care system. This book is designed to educate you to:

Healthcare Information Management

Systems, 4th edition, is a comprehensive volume addressing the technical, organizational and management issues confronted by healthcare professionals in the selection, implementation and management of healthcare information systems. With contributions from experts in the field, this book focuses on topics such as strategic planning, turning a plan into reality, implementation, patient-centered technologies, privacy, the new culture of patient safety and the future of technologies in progress. With the addition of many new chapters, the 4th Edition is also richly peppered with case studies of implementation. The case studies are evidence that information technology can be implemented efficiently to yield results, yet they do not overlook pitfalls, hurdles, and other challenges that are encountered. Designed for use by physicians, nurses, nursing and medical directors, department heads, CEOs, CFOs, CIOs, COOs, and healthcare informaticians, the book aims to be a indispensable reference.
