documentation is crucial.
Proper documentation

expensive and often damaging outcome. *Improving Nursing Documentation and Reducing Risk* helps nurse managers create policies, processes, and ongoing auditing practices to ensure that complete and accurate documentation is implemented by their staff, without creating additional time burdens. Nurse managers, especially new nurse managers, do not clearly understand their legal accountability for poor or inadequate documentation created by nursing staff who report to them. While each state's nurse practice act (NPA) differs, every NPA addresses nursing liability for documentation; however, many nurse managers remain unaware of these and other regulations that hold them accountable for the documentation crafted by their nurses. This book helps nurse managers protect themselves and their staff by clearly explaining to their employees the impact of documentation practices on reimbursement, educating them on the consequences of failure to document, and training them on how to document properly. This book will help you: Work directly with your staff to ensure accurate documentation Train nurses during orientation Educate your staff on the consequences of inaccurate documentation Create steps to share with your staff that will improve documentation Ensure complete comprehension of documentation issues through sample forms, auditing tools, and case studies

Telehealth Nursing
 Elsevier Health Sciences
 Handbook of Home Health Standards: Quality, Documentation, and Reimbursement includes everything the home care nurse needs to provide quality care and effectively document care based on accepted professional standards. This handbook offers detailed standards and documentation guidelines including ICD-9-CM (diagnostic) codes, OASIS considerations, service skills (including the skills of the multidisciplinary health care team), factors justifying homebound status, interdisciplinary goals and outcomes, reimbursement, and resources for practice and education. The fifth edition of this "little red book" has been updated to include new information from the most recently revised Federal Register Final Rule and up-to-date coding. All information in this handbook has been thoroughly reviewed, revised, and updated. Offers easy-to-access and easy-to-read format that guides users step by step through important home care standards and

documentation guidelines identify the plan of discharge that most effectively meets the patient's needs. Lists the crucial parts of all standards that specific members of the multidisciplinary team (e.g., the nurse, social worker) must uphold to work effectively together to achieve optimum patient outcomes. Resources for care and practice direct providers to useful sources to improve patient care and/or enhance their professional practice. Each set of guidelines includes patient, family, and caregiver education so that health care providers can supply clients with necessary information for specific problems or concerns. Communication tips identify quantifiable data that assists in providing insurance case managers with information on which to make effective patient care decisions. Several useful sections make the handbook thorough and complete: medicare guidelines; home care definitions, roles, and abbreviations; NANDA-approved nursing diagnoses; guidelines for home medial equipment and supplies. Small size for convenient carrying in bag or pocket! Provides the most up-to-date information about the newest and predominant reimbursement mechanisms in home care: the Prospective Payment System (PPS) and Pay For Performance (P4P). Updated terminology, definitions, and language to reflect the federal agency change from Health Care Financing Administration (HCFA) to Centers for Medicare & Medicaid Services (CMS) and other industry changes. Includes the most recent NANDA diagnoses and OASIS form and documentation explanations. New interdisciplinary roles have been added, such as respiratory therapist and nutritionist.,/LI>

Handbook of Home Health Care Administration Lippincott Williams & Wilkins

This unique, spiral-bound handbook is compact, portable, and written with busy home health nurses in mind! Organized by body system, it offers instant advice on assessment and care planning for the disorders

home health nurses are likely to encounter. Providing assessment guides for all body systems, the home environment, and the client's psychological status, it includes full care plans for over 50 illnesses and conditions most commonly encountered in the home. Each plan lists nursing diagnoses, short- and long-term expected outcomes, nursing interventions, and client caregiver interventions. Care plans are organized by body systems to allow for quick retrieval of information. Both short-term and long-term outcomes are included in the care plans to aid evaluation of the care provided. Detailed assessment guidelines are provided for all body systems to facilitate complete and comprehensive client examinations. Guidelines for environmental and safety assessments aid in the appraisal and improvement of clients' living conditions. Client and caregiver interventions are outlined in the care plans to promote active client participation in self-care.

The convenient pocket size makes transportation and use convenient to home health nurses. Appendices on documentation guidelines, laboratory values, medication administration, home care resources, and standard precautions provide quick access to useful home care information. Related OASIS items are identified in the assessment section, and ICD-9 diagnostic codes in the care plans section assist with proper home care documentation. Visit frequency and duration schedules are suggested within each care plan to assist nurses in evaluating and planning care. NANDA nursing diagnoses are consistent with the latest 2001-2002 nomenclature. An increase in suggested therapy referrals within the care plans and in a new appendix helps nurses identify indicators for specialized services. A fully updated Resources Appendix includes websites for easy access to home health service information.
