These Are Systems That More Than 98% Of Home Inspectors Are NOT Using... ..even though some are basic by my standards and those of the inspectors who are part of the Inspector Community that I coach. Inside the pages of this book, we are going to share with you some systems that are easy to use and will get you headed in the right direction... One other quick thing... I hear people sometimes say they can't do marketing because they don't have enough money. One of the biggest lies that people have led business owners to believe is that marketing is expense. Many of the systems we share in this book will cost you nothing - you simply have to implement them and make them part of every inspection. The good news is that they will make you money... Some systems do cost money, but if you are doing all the free or low-cost ones, you can easily afford the more advanced techniques. Let's start with the easy and free ones, then when you are ready to take your business to the next level, we can show you some of the more advanced marketing systems that have created millions for the people I coach. By the way, when these systems are implemented properly, the ROI (Return on Investment) FAR outweighs the cost. -MIKE CROW, North America's #1 & Only Home Inspector Marketing & Business Coach

The "Inspection Authorization Test Prep" provides Aviation Maintenance Technicians (AMTs) with all the information needed to pass the FAA's Knowledge Exam for Inspection Authorization, and helps candidates become familiar with the privileges and limitations of the highest level of maintenance certification. This book is an important reference source for all AMTs seeking to add Inspection Authorization (IA) to his or her qualifications, as well as AMT schools preparing students for the IA test. All IA candidates must take and pass the FAA's exam, yet it remains a "closed test" in that the exact database of questions is not available to the public, which makes the IA Test Prep a great way to prepare for it. The IA exam differs from other FAA exams in that questions do not refer to a specific figure. Instead, applicants must learn to glean the information they need from the FAA Supplement (CT-8080-8) made available for use during the test. The over 500 sample questions typify those that candidates are likely to encounter, and train readers in the use of the available documents. Answer choices are supported with explanations, with FAA references identified for further study. Also provides details on what applicants need to know about the certification process, insight into the function of an IA, and excerpts of regulations, advisory circulars, airworthiness directives, type certificate data sheets, FAA orders and aircraft specifications. Resources such as pertinent excerpts from these FAA documents and more are reprinted in this study guide; additionally, readers can access additional study material for this book at a special "Reader Resources" page at the ASA website. The IA Test Prep conveniently compiles the reference materials necessary to prepare for this exam into one volume, for an organized study program that AMT schools, instructors, and individuals alike can use to streamline their studies.
