DO NOT buy (or be sold) a home, church, or business security system before you read Deter & Minimize! Even if you already have a security system, this is a must-read. Way too many people think they have better security than they actually do. This book is a simple and fun read—a type of how-to guide for dealing with a security salesperson and purchasing a system. It is an entertaining work that is full of useful information on design, use, performance, and principles of home security systems. The author has taken a very dry and boring subject and has explained it in a simple, easy to comprehend, down-to-earth, conversational style that you would never expect from a work involving complicated electronic protection. Deter & Minimize is completely unbiased, and is not written to sell you anything. Many households have been, and will be, sold home security systems by slick salespeople or promising do-it-yourself advertisements. Some are great. Some are not so good. Deter & Minimize will help you stay away from the pitfalls of high-pressure sales pitches.
