Congress and Its Members Hodder & Stoughton

Have you ever felt average? That you're not special or extraordinary, just . . . normal? And that chances are society's obsession with always being the best and smashing life is setting us up for failure? Years of striving and pushing to be better than everyone else are breaking us. Fear of disappointment and our pursuit of someone else's definition of success tell us we're not enough. They tell us to work late, then work hard in the gym, overcommit, then post about #selfcare on our painstakingly curated social media feeds. They tell us to push ourselves until we break, all to prove our worth, to show we deserve our place. But are

we tolerating the lows to reach the fleeting highs, and are we missing all the good stuff along the way? Why are we programmed to live like this, and is it society that needs to change, not us? One thing's for sure - it's better to be average and happy than exceptional and miserable. We're all good enough, just as we are.

How are platforms such as Facebook and Twitter used by citizens to frame contentious parades and protests in ' post-conflict ' Northern Ireland? What do these contentious episodes tell us about the potential of information and communication technologies to promote positive intergroup contact in the deeply divided society? These issues are addressed in what is the first in-depth qualitative exploration of how social media were used during the union flag protests (December 2012-March 2013) and the Ardoyne parade disputes (July 2014 and 2015). The book focuses on the extent to which affective publics, mobilised and connected via expressions of solidarity on social media, appear to escalate or de-escalate sectarian tensions caused by these hybrid media events. It also explores whether citizen activity on these online platforms has the potential to contribute to peacebuilding in Northern Ireland.

This book equips readers—both students and communication

practitioners—with the theoretical understanding and practical skills they need to support nonprofit and for-profit organizations to create and assess their diversity, equity, inclusion (DEI), and social identity intersectionality goals. Through applied examples of the insider activist role that the communication function plays, the book helps future and current professional communicators navigate organizations toward authentic relationship-building with internal and external audiences. It teaches that embracing DEI includes acknowledging social identity intersectionalities—recognizing that people possess multiple social identity dimensions of age, culture, ethnicity/race, faith/spirituality, gender, physical/psychological ability, sexual orientation, social class, and more. In order to illuminate the theory discussed in the book, each chapter includes thought-provoking situation-opportunity sidebars, discussion questions for drilling deeper into the issues at hand, and case studies with applied lessons about DEI issues. This is an ideal text for advanced undergraduates and graduate courses in organizational communication, strategic communication, marketing communication, human resources, and public relations, as well as for communication practitioners working in these

subdisciplines.

Digital contention in a divided society IOS Press
Bringing together a range of perspectives, this book establishes a criminology of the domestic, paying particular attention to emerging spatial and relational reconfigurations. We move beyond criminologies of public and urban domains to consider over-looked non-public locales, and crimes and harms that occur in the home and other private spaces. Developed in the context of the COVID-19 lockdowns, where distinctions between public and private became increasingly untenable, the book considers how the pandemic has accelerated new patterns of behaviour, enabled by technology and shifting social relations. Drawing on a range of criminological topics, including victimisation, offending, property and violent crime, consumption, deviance and leisure, and zemiology, the book argues that the domestic sphere, and its relation to the public realm, needs to be more carefully conceptualised if criminology is to respond to new spatial and relational dimensions of changing lifestyles. An accessible and compelling read, this book will appeal to students and scholars of criminology, sociology, politics, geography, history, gender, surveillance and security, and all those interested in a criminology of the domestic sphere.

The Tensions of Algorithmic Thinking Springer
This book explores how digital culture is transforming museums in the 21st century. Offering a corpus of new evidence for readers to explore, the authors trace the digital evolution of the museum and that of their audiences, now fully immersed in digital life, from the Internet to home and work. In a world where life in code and digits has redefined human information behavior and dominates daily activity and communication, ubiquitous use of digital tools and technology is radically changing the social contexts and purposes of museum exhibitions and collections, the work of museum professionals and the expectations of visitors, real and virtual. Moving beyond their walls, with local and global communities, museums are evolving into highly dynamic, socially aware and relevant institutions as their connections to the global digital ecosystem are

strengthened. As they adopt a visitor-centered model and design visitor experiences, their priorities shift to engage audiences, convey digital collections, and tell stories through exhibitions. This is all part of crafting a dynamic and innovative museum identity of the future, made whole by seamless integration with digital culture, digital thinking, aesthetics, seeing and hearing, where visitors are welcomed participants. The international and interdisciplinary chapter contributors include digital artists, academics, and museum professionals. In themed parts the chapters present varied evidence-based research and case studies on museum theory, philosophy, collections, exhibitions, libraries, digital art and digital future, to bring new insights and perspectives, designed to inspire readers. Enjoy the journey!

Safe and Secure Cities Routledge

Monumental in scope and vividly detailed, *Chocolate City* tells the tumultuous, four-century story of race and democracy in our nation's capital. Emblematic of the ongoing tensions between America's expansive democratic promises and its enduring racial realities, Washington often has served as a national battleground for contentious issues, including slavery, segregation, civil rights, the drug war, and gentrification. But D.C. is more than just a seat of government, and authors Chris Myers Asch and George Derek Musgrove also highlight the city's rich history of local activism as Washingtonians of all races have struggled to make their voices heard in an undemocratic city where residents lack full political rights. Tracing D.C.'s massive transformations--from a sparsely inhabited plantation society into a diverse metropolis, from a center of the slave trade to the nation's first black-majority city, from "Chocolate City" to "Latte City"--Asch and Musgrove offer an engaging narrative peppered with unforgettable characters, a history of deep racial division but also one of hope, resilience, and interracial cooperation.

Not all are called to be leaders, but all of us are called to followership. In these confusing times of fake news, uncertain truths, and questionable leaders, we must understand and respond with faithful followership. Moreover, faithful followership isn't required only when we step into the public square or tune in to our favorite news channel. In our personal

journeys, families and marriages, workplaces, churches, and communities, we must decide who to follow and how to follow. Old patterns and habits require discernment, clarity with gender, culture, and race, and other factors, while understanding the important roles of worldview and community.

Social Media Marketing All-in-One For Dummies Springer Nature

Digital Democracy, Social Media and Disinformation discusses some of the political, regulatory and technological issues which arise from the increased power of internet intermediaries (such as Facebook, Twitter and YouTube) and the impact of the spread of digital disinformation, especially in the midst of a health pandemic. The volume provides a detailed account of the main areas surrounding digital democracy, disinformation and fake news, freedom of expression and post-truth politics. It addresses the major theoretical and regulatory concepts of digital democracy and the 'network society' before offering potential socio-political and technological solutions to the fight against disinformation and fake news. These solutions include self-regulation, rebuttals and myth-busting, news literacy, policy recommendations, awareness and communication strategies and the potential of recent technologies such as the blockchain and public interest algorithms to counter disinformation. After addressing what has currently been done to combat disinformation and fake news, the volume argues that digital disinformation needs to be identified as a multifaceted problem, one that requires multiple approaches to resolve. Governments, regulators, think tanks, the academy and technology providers need to take more steps to better shape the next internet with as little digital disinformation as

possible by means of a regional analysis. In this context, two cases concerning Russia and Ukraine are presented regarding disinformation and the ways it was handled. Written in a clear and direct style, this volume will appeal to students and researchers within the social sciences, computer science, law and business studies, as well as policy makers engaged in combating what constitutes one of the most pressing issues of the digital age.

The Age of Insurrection CQ Press

The January 6th attack is an unprecedented crime in American history. Sprawling and openly political, it can't be handled by the traditional rules and norms of law enforcement--threatening the very idea of justice and its role in society. The attack on the Capitol building following the 2020 election was an extraordinarily large and brazen crime. Conspiracies were formed on social media in full public view, the law-breakers paraded on national television with undisguised faces, and with outgoing President Donald Trump openly cheering them on. The basic concept of law enforcement--investigators find criminals and serve justice--quickly breaks down in the face of such an event. The system has been strained by the sheer volume of criminals and the widespread perception that what they did wasn't wrong. A mass of online tipsters--"sedition hunters"--have mobilized, simultaneously providing the FBI with valuable intelligence and creating an ethical dilemma. Who gets to serve justice? How can law enforcement still function as a pillar of civil society? As the foundations of our government are questioned, the FBI and Department of Justice are the first responders to a crisis of democracy and law that threatens to spread, and fast. In this work of extraordinary reportage, Ryan Reilly gets to know would-be revolutionaries, obsessive online sleuths, and FBI agents, and shines a light on a justice system that's straining to maintain order in our polarized country. From the moment the police barriers were breached on January 6th, 2021, Americans knew something had profoundly changed. Sedition Hunters is the fascinating, high-stakes story of what happens next.

Social media are now established as an important aspect of contemporary education. We live in times where social media applications such as Facebook, Twitter, Tumblr and Snapchat are mainstream educational tools; where most new educational technologies claim to have a 'social' element; and it increasingly makes no sense to distinguish between learning 'online' and 'offline'. It studies users' experiences and views of social media; addresses questions of equality and diversity concerning who is doing what with social media; examines how the use of social media applications sits alongside pre-existing cultures and structures of schooling; and brings to light the unintended and unexpected results of social media in education. Altogether, this collection of writing provides a nuanced and interesting discussion of the realities of social media use across different aspects of education. This book was originally published as a special issue of *Learning, Media and Technology*. *Social Isolation of Older Adults* Wipf and Stock Publishers

This Handbook provides the knowledge and tools needed to understand how displacement is lived, governed, and mediated as an unfolding and grounded process bound up in spatial inequities of power and injustice. The handbook ensures, first, that internal displacements and their everyday (re)occurrences are not overlooked; second, it questions 'who counts' by including 'displaced' people who are less obviously identifiable and a clearly circumscribed or categorised group; third, it stresses that while displacement suggests mobility, there are also periods and spaces of enforced stillness that are not adequately reflected in the displacement literature; and fourth, it re-evokes and explores the 'place' in displacement by critically interrogating peoples' 'right to place' and the significance of placemaking, unmaking, and remaking in the contemporary world. The 50-plus chapters are organised across seven themes designed to further develop interdisciplinary study of the technologies, journeys, traces, governance, more-than-human, representation, and resisting of displacement. Each of these thematic sections begin with an intervention which spotlights actions to creatively and strategically intervene in displacement. The interventions explore myriad meanings and manifestations of displacement and its contestation from the perspective of displaced people, artists, writers, activists, scholar-activists, and scholars involved in practice-oriented research. The Handbook will be an essential companion for academics, students, and practitioners committed to forging solidarity, care, and home in an era of displacement.

Why does inequality have such a hold on American society and public policy? And what can we, as citizens, do about it?

Inequality in America takes an in-depth look at race, class, and gender-based inequality across a wide range of issues from housing and education to crime, employment, and health. Caliendo explores how individual attitudes can affect public opinion and lawmakers' policy solutions. He also illustrates how these policies result in systemic barriers to advancement that often then contribute to individual perceptions. This cycle of disadvantage and advantage can be difficult—though not impossible—to break. "Representing" and "What Can I Do?" feature boxes highlight key public figures who have worked to combat inequality and encourage students to do the same. The third edition has been thoroughly revised to include the most current data and cover recent issues and events such as Trump Administration policies, the #MeToo movement, and U.S. Supreme Court decisions affecting issues of racial representation and voting rights.

Concise and accessible, *Inequality in America* paves the way for students to think critically about the attitudes, behaviors, and structures of inequality.
