Think About the Connections Before You Buy Your Equipment.

How To Do Wiring For Home Theater

Wire must be supported every 4-1/2 feet and within 1 foot of a junction box. Use wire ties and wire-tie clamps. The staples electricians use for regular AC wiring may damage low-voltage cables if they're nailed down too tightly. For bundling cables at the back of a component, a reusable wire wrap comes in handy.

Components of Home Theater Wiring
Diagram and Some Tips. There are two
things that will be present in almost any
Home Theater Wiring Diagram. The first
element is emblem that indicate electrical
component from the circuit. A circuit is
usually composed by many components.
The other thing that you will discover a
circuit diagram would be lines.

Usually, using a 16-gauge wire is
recommended for most home theater
applications. However, if the wiring network
for your home theater requires more than 50

feet of wire or if you want to set up in-wall or ceiling speakers, you may need to use a thicker wire (preferably 14 or 12-gauge) because long cable runs can cause considerable power losses.
