The pulse jet is the thug of the jet family and the turbojet the middle class nutter. Ok so i've done pulse jets and it seemed only right to make one of these as they are little more sophisticated in appearance and have a more refined jet engine sound. However they are still quite simple in the ...

Homemade electric jet engine actually works! The valveless pulse jet engine or pulse detonation engine is the most simple type of jet and is therefore popular among hobbyists as a DIY project. it is often referred to as a ' tuned pipe ' because its operation depends upon making the parts the right size and shape so

that it fires, or resonates at the engine's natural, fundamental frequency.

Plans for Turbine Jet
Engines - Plans for
Everything

Note that turbine rotors
can shatter so there is a
risk that a shattered
wheel could punch its
way out of a turbo casing
(although modern turbo's
are strong in normal
operation, making a
turbo into a jet engine is
not normal operation and
can result in much higher
rotational speeds that
the turbo is originally
designed to reach !!).
