Today children who are not fluent in English—legal and illegal immigrants, refugees, and native born—are the fastest growing portion of our population, accounting for more than half the children in classrooms in many city schools. Bilingual education programs established by federal and state laws have required that such students be taught basic subjects in their native languages rather than in English. Judged by most applicable measures—such as achievement scores and dropout rates—these programs have not been successful. This edition includes new material on recent efforts to reform bilingual education, on the growing trend across the country toward English language programs, on the latest national research studies, and on the movement to make English the official language of the United States. Forked Tongue is a devastating inside account of how the twenty-eight-year experiment in bilingual education has failed our language-minority children—and why. Rosalie Porter draws on local, state, and international experience to provide us with the first authoritative account of which policies, programs, and practices actually succeed with the children they are intended to serve. Forked Tongue will be of interest to educators, sociologists, and scholars interested in second language acquisition.

The award-winning, New York Times--bestselling chronicle of the sensational murder trial that would be the capstone of Lincoln's legal career. In the summer of 1859, twenty-two-year-old "Peachy" Quinn Harrison went on trial for murder in Springfield, Illinois. When Harrison's father hired Abraham Lincoln to defend him, the case took on momentous meaning. Lincoln's debates with Senator Stephen Douglas the previous fall had transformed the little-known, self-taught lawyer into a respected politician of national prominence. As Lincoln contemplated a dark-horse run for the presidency in 1860, this case involved great risk. A loss could diminish Lincoln's untarnished reputation. But the case also posed painful personal challenges for Lincoln. The victim had been his friend and his mentor. The accused killer, whom Lincoln would defend, was the son of a close friend and loyal supporter. And to win this trial he would have to form an unholy allegiance with a longtime enemy, a revivalist preacher he had twice run against for political office. Lincoln's Last Trial vividly captures Lincoln's dramatic courtroom confrontations as he fights for his client—but also for his own blossoming political future. It is a moment in history that shines a light on our legal system, our history, and one of our greatest presidents. A Winner of the Barondess/Lincoln Award

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely

successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.
