Haynes Manuals N. America,
Incorporated
A faithful reproduction of the
1970 Floyd Clymer
publication of the official
Honda Factory Workshop
Manual specific to the n00
50cc Super Cub series of
motorcycles. This manual
includes all of the data that

you would expect from a
factory publication for the
repair and overhaul of all
major and minor mechanical
and electrical components. It
also includes a comprehensive
trouble shooting section plus
tables of technical data,
tolerances and fits making it an
invaluable resource for
collectors and restorers of
these classic Honda
motorcycles. There are 136
illustrations and each
procedure is explained in a
step-by-step method using an
appropriate illustration. The
translation from Japanese to

English is, at times, a little
quirky but the illustrations
make up for any difficulty in
understanding what needs to
be done! There are separate
sections that deal with the
repair and overhaul
procedures for the engine,
transmission, wheels and
brakes, front forks, frame and
carburetor, plus a detailed
electrical service section. This
is a - must have - reference for
any Honda enthusiast and
would certainly assist in
helping any potential
purchaser better understand
the inner workings prior to

purchasing one of these classic motorcycles. Out-of-print and unavailable for many years, this book is highly sought after on the secondary market and we are pleased to be able to offer this reproduction as a service to all Honda enthusiasts worldwide.

Honda Motorcycles
Workshop Manual C100
Super Cub Haynes Manuals
N. America, Incorporated
Each Haynes manual provides specific and detailed instructions for performing everything from basic maintenance and troubleshooting to a complete overhaul of the machine, in this case the Honda CBR600RR, model years 2003 through 2006. Do-it-yourselfers will find this service and repair manual more comprehensive than the factory manual, making it

an indispensable part of their tool box. A typical Haynes manual covers: general information; troubleshooting; lubrication and routine maintenance; engine top end; engine lower end; primary drive, clutch and external shift mechanism; transmission and internal shift mechanism; engine management system; electrical system; wheels, tires and drivebelt; front suspension and steering; rear suspension; brakes; body, and color wiring diagrams. An index makes the manual easy to navigate.

Manuals N. America, Incorporated

116 pages, with more than 360 illustrations and diagrams, size 8.25 x 10.75 inches. At the time of Floyd Clymer's unexpected demise in 1970, there were a number of manuals that had been completed and were ready for publication.

This 'Honda 125cc - 200cc' is one of those completed but previously unpublished compilations of various Honda Factory

Manuals for the 125cc, 160cc, 175cc and 200cc center cam drive twins. While this manual was likely completed in early 1970 it actually covers the 1964 through 1978 street, scrambler and motosport models. The primary focus is the maintenance and repair of the major mechanical and electrical components including: Engine, Transmission, Clutch, Fuel, Electrical, Frame, Suspension and Steering. Owners of the earlier 125-150cc C92 &

C95 twin cylinder 'Benly' series (1959-1966) are directed to our Honda factory workshop manual ISBN 9781588500823 which is exclusive to those models. After his visit to Japan in 1961, Floyd Clymer published 'The Complete Catalog of Japanese Motor Vehicles' (ISBN 9781588502209). Based on his experiences during that visit, Floyd also anticipated the need for repair manuals for those Japanese motorcycles that were just starting to be

imported into the USA [Yamaha (1958), Honda (1959), Suzuki (1963)]. The predominance of the Floyd Clymer Japanese motorcycle manuals were reprints or compilations of the factory publications, which today makes them more desirable than the current aftermarket manuals.
