America, Incorporated After WWII Americans were anxious to re-stoke the economy after a long "make-do with what you have" dry spell. By the 1950s new highways were being built, new trucking companies were being formed and old ones revived. Americans were buying newly-styled cars and the latest technologies once again. Semi-trucks helped pave the way for this huge growth spurt in America with dependable trucks built by Mack, GMC, Chevrolet, Ford, Dodge, International, White Freightliner, Peterbilt, Kenworth, Diamond T, Reo, Autocar, Brockway, Sterling and others, many using the increasingly popular diesel engines made by Buda, Hercules, Waukesha, and Cummins, which helped their heavy loads haul quicker. Ron Adams portrays this booming era with over 300 superb photos of trucks hauling cement, fuel, and a variety of goods to enthusiastic Americans.

Readers gain a solid understanding of Newtonian dynamics and its application to real-world problems with Pytel/Kiusalaas' **ENGINEERING MECHANICS: DYNAMICS, 4E**. This edition clearly introduces critical concepts using learning features that connect real problems and examples with the fundamentals of engineering mechanics. Readers learn how to effectively analyze problems before substituting numbers into formulas. This skill prepares readers to encounter real life problems that do not always fit into standard formulas. The book begins with the analysis of particle dynamics, before considering the motion of rigid-bodies. The book discusses in detail the three fundamental methods of problem solution: force-mass-acceleration, work-energy, and impulse-momentum, including the use of numerical methods.
