gX series Engines - American Honda Motor Company

Honda's GC and GS engines use the world's first small engine internal timing belt, designed to last the lifetime of the engine. Small engine timing belts are usually external and are subject to wear caused by dirt.

Honda's internal timing belt runs in oil, eliminating the need for conventional drive gears. This design:

How does it work 1.
Combustible gas can be
converted from high pressure
gas to low pressure gas and
supply gas smoothly. 2. When
the generator started ,the
negative pressure enter into
the pressure regulating valve
through the mixer, the sealing

arm swing of the valve open, the combustible gas supply generator after decompression, so the machine work orderly.
