NEW YORK TIMES BESTSELLER • "A fascinating look at how consumers perceive logos, ads, commercials, brands, and products."—Time  
How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can "cool" brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? *Buyology* is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

Each "Missing In Action (M.I.A.) Angel" assignment is to be with someone who is willing to give their life in combat to protect or save others. Some just need that additional bit of help to survive, while others need the presence of an "M.I.A. Angel" as they approach death. It's not easy being an "M.I.A. Angel" although it is many times rewarding. The downside it that

sometimes there is nothing that can be done to help, other than the assignment knowing that an angel is with them when they die.

**The Automotive Chassis** W. W. Norton

A delightful and often humorous account of life with the Triumph motorcycle company in its heyday. Hughie Hancox started work with the Triumph Engineering Company (manufacturer of Triumph motorcycles) in 1954 and, apart from a short break for national service, stayed with the company until its closed in 1974. In his time with Triumph, Hughie worked in the Experimental, Service, Product Road Test, Toolroom, Final Production Assembly and Service Repair Shop departments before joining the staff in the Service Office. He also served as a Technical Writer/Advisor/Customer Relations "Trouble Shooter." Even his National Service was spent with the "White Helmets" motorcycle display team! Here, Hughie tells the story of his life in the famous Meriden factory and of his many adventures with Triumph motorcycles and Triumph people and, by doing so, records the fascinating inside story of one of Britain's greatest motorcycle marques.

**Automotive Fuels Reference Book** Cengage Learning

An overview of chassis technology, presenting a picture for vehicle construction and design engineers in education and industry. The book acts as an introduction to the engineering design of automobiles' fundamental mechanical systems. This edition has a new author team and has been updated to include new technology in total vehicle and suspension design, including platform concept and four-wheel drive technology.

**Popular Mechanics** Createspace Independent Publishing Platform

The first two editions of this title, published by SAE International in 1990 and 1995, have been best-selling definitive references for those needing technical information about automotive fuels. This long-awaited new edition has been thoroughly revised and updated, yet retains the original fundamental fuels information that readers find so useful. This book is written for those with an interest in or a need to understand automotive fuels.

Because automotive fuels can no longer be developed in isolation from the engines that will convert the fuel into the power necessary to drive our automobiles, knowledge of automotive fuels will also be essential to those working with automotive engines. Small quantities of fuel additives increasingly play an important role in bridging the gap that often exists between fuel that can easily be produced and fuel that is needed by the ever-more sophisticated automotive engine. This book pulls together in a single, extensively referenced volume, the three different but related topics of automotive fuels, fuel additives, and engines, and shows how all three areas work together. It includes a brief history of automotive fuels development, followed by chapters on automotive fuels manufacture from crude oil and other fossil sources. One chapter is dedicated to the manufacture of automotive fuels and fuel blending components from renewable sources. The safe handling, transport, and storage of fuels, from all sources, are covered. New combustion systems to achieve reduced emissions and increased efficiency are discussed, and the way in which the fuels' physical and chemical characteristics affect these combustion processes and the emissions produced are included. There is also

discussion on engine fuel system development and how these different systems affect the corresponding fuel requirements. Because the book is for a global market, fuel system technologies that only exist in the legacy fleet in some markets are included. The way in which fuel requirements are developed and specified is discussed. This covers test methods from simple laboratory bench tests, through engine testing, and long-term test procedures.

**MG, the Untold Story** CRC Press

MG Rover Group Limited (MGRG) went into administration on 8 April 2005. On 31 May 2005 inspectors were appointed by the Secretary of State for Trade and Industry to investigate the affairs of Phoenix Venture Holdings (MGRG's ultimate parent company), MGRG, 32 other companies in the Group and MGR Capital Limited. This report addresses the period between the acquisition of MGRG by Techtronic Limited in 2000 and MGRG's entry into administration in 2005. It pays

particular reference to the events leading up to the appointment of administrators of MGRG in April 2005 and the matters raised in a review of financial statements by the Financial Reporting Review Council (the FRRP review is included in the report as an exhibit). The inspectors criticise the unreasonably large financial awards to the four members of the Phoenix Consortium and the chief executive of MGRG. This report has been informed by documentary and computer evidence from numerous sources, including data from the Group's Longbridge site and national sales companies. 95 individuals were interviewed formally and 20 witness statements provided; all of these responses have been considered in this report.

Riding the Dirt Haynes Manuals N. America, Incorporated

"I have to be honest with you. Islam is on very thin ice with me...Through our screaming self-pity and our conspicuous silences, we Muslims are conspiring against ourselves. We're in crisis and we're dragging the rest of the world with us. If ever there was a moment for an Islamic reformation, it's now. For the love of God, what are we doing about it?" In blunt, provocative, and deeply personal terms, Irshad Manji unearths the troubling cornerstones of mainstream Islam today: tribal insularity, deep-seated anti-Semitism, and an uncritical acceptance of the Koran as the final, and therefore superior, manifesto of God. In this open letter to Muslims and non-Muslims alike, Manji asks arresting questions. "Who is the real colonizer of Muslims - America or Arabia? Why are we all being held hostage by what's happening between the Palestinians and the Israelis? Why are we squandering the talents of women, fully half of God's creation? What's our excuse for reading the Koran literally when it's so contradictory and ambiguous? Is that a heart attack you're having? Make it fast. Because if more of us don't speak out against the imperialists within Islam, these guys will walk away with the show." Manji offers a practical vision of how the United States and its allies can help Muslims undertake a reformation that empowers women, promotes respect for religious minorities, and fosters a competition of ideas. Her vision revives Islam's lost tradition of independent thinking. This book will inspire struggling Muslims worldwide to revisit the foundations of their faith. It will also compel non-Muslims to start posing the important questions without fear of being deemed "racists." In more ways than one, *The Trouble with Islam* is a clarion call for a fatwa-free future.

*Honda Accord Automotive Repair Manual* Haynes Publications

The understanding of adhesion and interfacial effects has benefited from various technological advances in recent years. Advances in laboratory equipment, analytical tools such as the nanoindentor, SIMS, and ESCA, and improvements in computing technology have greatly expanded the relevant body of knowledge. Rapid progress in adhesion and interfacial science has made dissemination of results in a timely fashion more important than ever. Accordingly, the editors of this book organized an ACS symposium, sponsored by the Division of Polymer Chemistry, entitled *Fundamentals of Adhesion and Interfaces*. The papers in this volume were selected from those presented at the symposium.
