Honda Gas Powered Pump | Used Truck Details

With the exception of a few water-cooled Formula 1 cars, Honda built nothing but air-cooled engines for its motorcycles and cars through the 1960s. Soichiro Honda loved air cooled engines. "Since water-cooled engines eventually use air to cool the water, we can implement air cooling from the very beginning," professed Mr. Honda.

Ten Thousand Miles on the Final Aircooled Honda

Honda Engines has hundreds of different versions of each engine model, each for a

different application. The best and most accurate way to be sure you are getting the right parts for your specific engine is to enter the serial number.

Amazon.com: Honda Marine BF2.3
2.3 HP Engine 15" Shaft Gas ...

The engine was SOHC air-cooled, with a fan attached to the flywheel to pull cool air through the engine block, labeled DDAC, or Duo Dyna Air Cooling. This warm air, and additional hot air from around the exhaust manifold , was then used to heat the passenger compartment, a novel approach which was not commonly used afterward.

**Honda GX360 K1 (359 cc, 13.0 HP)
water-cooling engine ...**

The Honda GD410 is a (411 cc, 25.2 cu-in) single-cylinder air-cooled 4-stroke internal combustion diesel engine with horizontal

shaft, manufactured by Honda Motor Company for general-purpose applications since 1988. This engine has a single cylinder and overhead valves. The GD410 engine has a recoil starter or starter motor.

**Honda BF2.3 Outboard Engine | 2
hp Portable Outboard Specs ...**

Current Honda general-purpose engines are air-cooled 4-stroke gasoline engines but 2-stroke, Diesel, water-cooled engines were also manufactured in the past. The current engine range provide from 1 to 22 hp (0.7 to 16.5 kW). More than 5 million general-purpose engines were manufactured by Honda in 2009.
