Glenn's Honda Haynes
Manuals N. America,
Incorporated
238 pages and more than
600 illustrations and charts,
size 8.25 x 10.75 inches.
At the time of Floyd
Clymer's unexpected
demise in 1970, there were
a number of manuals that
had been completed and
were ready for publication;
this Honda CB750 is one of
those manuals. When the
original manual was
compiled in either late
1969, or early 1970, it was
only applicable to the first
series of 1969/70 S.O.H.C.

CB750 (Sandcast) and
CB750K0 models and minor
changes to these early
models are noted in the
text. However, detailed
information on these
changes (and subsequent
changes) have been
updated, by the addition of
supplements, that cover the
1971 to 1978 CB750K (K1
K8) series plus the 1975 to
1978 CB750F (F0 F3)
models. There were a
number of 'running changes'
made throughout the
10-year production run of
these models and, in order
to provide information
applicable to those changes,
the appropriate supplements

are appended to the rear
section of this manual. Prior
to commencing any work
the reader is encouraged to
review those supplements
with regard to applicable
engine number notations as
whenever engine numbers
are stated, all
specifications, maintenance
and repair instructions will
be specific to that particular
series. Beginning in 1968
and extending through the
1975 model year, the 'K'
suffix often, but not always,
changed on an annual basis.
'K0' was normally used to
indicate the first model in
the series with updated
versions identified as K1,

K2, K3 etc. While the 'K' number designations continued in use outside the USA through 1978, in September 1973, American Honda adopted a year identifier within the model number - for example; a CB750K'76 would be a 1976 USA model but in most other countries that same model would be identified as a CB750K6. Setting this potential for confusion aside, we can state that this manual covers the 1969 through 1978 S.O.H.C. CB750K and CB750F models. The CB750 was a true 'superbike' but it was also

readily available and reasonably priced. After its initial launch in 1969, the CB750 remained in production (virtually unchanged) through 1978. With a 10-year production run of approximately 450,000 units, no one could have anticipated that it was destined to become a collector's item. Consequently, we are pleased to offer this updated and expanded version of the original Floyd Clymer manual as a service to all 750cc S.O.H.C. Honda owners, enthusiasts and restorers worldwide. Finally, please note that the

text in the original manual was translated from Japanese into English. Consequently, some of the phrasing, grammar, punctuation and word usage may be subtly different from that commonly used in the English language. However the information, as presented, is readily understandable. In addition, while we have done our best to identify any anomalies and errors that may have occurred during the original translation process, we are certain that we will have missed one or two and we request your indulgence in ignoring them.
