Moving to a new Amish settlement in small-town Colorado was a brave new start for independent-minded quiltmaker Esther Kiem. But helping her reckless relative will really put her special matchmaking skills to the test . . . Mischievous and rebellious, young Ben Kiem is making the wrong kind of name for himself throughout the town of Byler. And even though his sister-in-law, Esther, somehow coaxes him into keeping company with sensible Linda Eicher, Ben can ’ t see anything they have in common. Or that he could ever be good enough for someone like her. But Linda ’ s down-to-earth nature and unexpected understanding have Ben trying his best to be better, no matter how challenging . . . Linda couldn ’ t be more surprised when Ben turns out to be caring and helpful, despite his rowdy pranks and bad-news friends. And falling in love with him suddenly seems just right. But when a heartbreaking misunderstanding comes between them, both she and Ben must risk enough to trust, stitch the pieces back together—and dare a forever precious happiness. Numerical procedures based on the 2-D and 3-D full potential equations and the 2-D Navier-Stokes equations were developed to study the effects of leading and trailing edge flap motions on the aerodynamics of parallel airfoil-vortex interactions and on the aerodynamics and acoustics of the more general self-generated rotor blade vortex interactions (BVI). For subcritical interactions, the 2-D results indicate that the trailing edge flap can be used to alleviate the impulsive loads experienced by the airfoil. For supercritical interactions, the results show the necessity of using a leading edge flap, rather than a trailing edge flap, to alleviate the interaction. Results for various time dependent flap motions and their effect on the predicted temporal sectional loads, differential pressures, and the free vortex trajectories are presented. For the OLS model rotor, contours of a BVI noise metric were used to quantify the effects of the trailing edge flap on the size and directivity of the high/low intensity noise region(s). Average reductions in the BVI noise levels on the order of 5 dB with moderate power penalties on the order of 18 pct. for a four bladed rotor and 58 pct. for a two bladed rotor were obtained. Ra?unalniška dinamika teko?in predstavlja u?inkovito orodje pri iskanje izboljšav na podro?ju motorjev z notranjim zgorevanjem. Omogo?a analiziranje tokovnih karakteristik znotraj posameznih delov motorja in vpliv njihovih oblik na delovanje motorja in njegove karakteristike. Nekatere dovolj hitre programe ra?unalniške dinamike teko?in lahko uporabimo za ra?unanje odziva pri optimalnem projektiranju delov motorja. V okviru naloge je prikazano oblikovanje sesalnega kolektorja s posebnimi zahtevami za štirivaljni štiritaktni motor Honda CBR 600 F2. Z uporabo programov ra?unalniške dinamike teko?in FIRE in BOOST (AVL Gradec) so bile analizirane karakteristike zra?nega toka skozi sesalni kolektor in potek zunanjih karakteristik motorja. Numeri?ni dobljeni rezultati so bili primerjani z rezultati meritev, ki so bile izvedene v Laboratoriju za motorje Fakultete za strojništvo Maribor. Primerjava je pokazala dobro ujemanje med numeri?nimi in izmerjenimi rezultati in s tem potrdila ustreznost programov FIRE in BOOST pri iskanju izboljšav delov motorja. Uporaba ra?unalniške dinamike teko?in pomeni prihranek ?asa in denarja namenjenega izdelavi in preizkušanju delov, ki ne dajejo želenih rezultatov. Na koncu je bilo izvedeno še optimiranje sesalnega kolektorja z uporabo programa za optimalno projektiranje iGO (FS Maribor), ki temelji na gradientni aproksimacijski metodi. Za ra?unanje odziva je bil uporabljen program BOOST.

The authors offer evidence that U.S. interest rate policy has an important influence in the determination of credit spreads on emerging market bonds over U.S. benchmark treasuries and therefore on their cost of capital. Their analysis improves on the existing literature and understanding by addressing the dynamics of market expectations in shaping views on interest rate and monetary policy changes and by recognizing nonlinearities in the link between U.S. interest rates and emerging market bond spreads, as the level of interest rates affect the market's perceived probability of default and the solvency of emerging market borrowers. For a country with a moderate level of debt, repayment prospects would remain good in the face of an increase in U.S. interest rates, so there would be little increase in spreads. A country close to the borderline of solvency would face a steeper increase in spreads. Simulations of a 200 basis points (bps) increase in U.S. interest rates show an increase in emerging market spreads ranging from 6 bps to 65 bps, depending on debt/GDP ratios. This would be in addition to the increase in the benchmark U.S. 10 year Treasury rate.

What is the Kama Sutra? Is it a spiritual text written by a visionary man of wisdom in India almost two millennia ago? Or is it the world's first mucky book? Well, it's the former - it's a spiritual text written by a visionary man of wisdom in India almost two millennia ago. Though shocking for its time, the Kama Sutra has gone on to become the world's most respected guide book on all matters sexual, and is now on top of the wardrobes or under the beds of over sixty percent of the world's teenage boys. It is a common and misconceived belief among the younger generations that sex is something not only void in the minds of our senior citizens, but is most likely physically impossible for those who are at or beyond retirement age. The glorious truth may come as a bit of a shock to the youth of today - it may even conjure up images in their minds best left 'till after lunch! The world's oldies are sexually active. New and exciting research has uncovered startling new evidence that oldies are still 'at it', and still 'do it' whenever they don't have a bad back. Can it be true? Are our most senior citizens getting their wrinkly legs over? If you are an older person, take heart - there's a lot of dusty action out there. Sex in the twilight years, though similar in mechanics to the couplings of youth, is in fact vastly different. This book exposes the secret world of grey love and covers every aspect of senior congress - from geriatric anatomy and attraction, through to mating rituals, sex positions, post-sex heart condition medication and proper service and care of pace makers.
