*Problems - part 1*

2002 Honda Civic lx coupe - transmission noise between 10-40 mph. As transmission would change gears, noise would reduce. Noise would get worse as car

accelerated. Common problem with this year/model/make - Honda will not recall or repair. Honda Civic Transmission Problems and Repair Descriptions ...

The contact states the transmission makes a high pitch noise when starting the vehicle. After the vehicle is warmed up the noise will go away. When

pressing the accelerator pedal there is a delay in acceleration.

She took the vehicle to the dealer; they stated the transmission needed to be replaced.

Honda Civic Whining Noise

When Accelerating. A whining

sound when accelerating is

almost always caused by a bad

accessory attached to your

Civic's engine. Here are the

most common causes of whining

noises when accelerating: 1. Bad

Alternator. When an alternator is

going bad, it'll often begin to put

out a high pitched whining

sound. It should also be

accompanied by the battery light.

The noise will go away as the engine engages and you drive, but eventually other problems will occur due to the loose parts. Difficulty or Inability to Shift If you know the clutch is good, then difficulty or a complete inability to shift means very likely that your transmission transaxle assembly has gone bad.

**Signs of a Bad Manual**

**Transmission | It Still Runs**

Problems with the transmission can also be revealed through a grinding noise. A grinding noise may come from clashing gears. The clashing may happen because of worn or damaged gears, linkage problems due to wear or need of adjustment. Other potential sources could be a worn or damaged synchronizer, shift fork, or rail and bearing shafts.

### Honda Transmission

#### Problems: What You Should Know!

There are a few key things to look out for when determining the root of your Honda transmission problems. Noticing these signs can give you an indication that something is wrong with the transmission, and can help you diagnose and cure the problem. The first sign of a faulty transmission is whining and clunking noise.

I have a 2007 Honda Civic Si with about 130k miles on it. I am hearing a knocking or thumping sound when moving. The noise will
