Honda Civic Transmission Noise Problems - part 1

205-horsepower 2.4L I4 6-speed manual FWD 38000 mi Clutch groans intermittently when moving off in first gear. It sounds like a dry/worn throw out bearing, however, the symptoms suggest something else - the noise only occurs when the clutch is being slipped.

Diagnosing Symptoms of a Bad Manual Transmission ...

Problems with the transmission can also be revealed through a grinding noise. A grinding noise may come from clashing gears. The clashing may happen because of worn or damaged gears, linkage problems due to wear or need of adjustment. Other potential sources could be a worn or damaged synchronizer, shift fork, or rail and bearing shafts.
