For nearly 80 years, shaft-drive boxer twins have traditionally formed the backbone of the BMW motorcycle line-up. For many enthusiasts of the Bavarian marque the classic BMW twin was the R90S of 1973-76. Over the decades, successive generations of durable machines - including the R100S, fully-faired R100RS, four-cylinder K-series, high-performance R1100RS and an entire family of touring and sporting models ranging from 850 to 1200cc - would ensure the BMW boxer twins a place in the Haynes "Great Bikes" series. This book covers: historical context, racing, the wartime R75 and R69S; the "75" series which enabled BMW to compete with the high-performance Japanese machines; the R90S, the "76" and Superbike performance; the R100RS, the "77" and the touring R100RT; smaller twins, smaller potential; the R89G/S, including a Paris-Dakar version; rationalization of the boxer range, and the new twins that included four-valve heads and electronic engine management; and technical specifications from 1969 to 2003.

In 1961 a production 500cc Velocette Venom Clubman Veeline achieved a world record, twenty-four hours at a speed of 100.05mph. It was the first motorbike of any size to perform the feat, and to this date no other motorbike of comparable size has equaled or bettered its record. It was the culmination of almost fifty-five years of technological excellence from the Birmingham factory, a time that had seen the company win both the Junior and Senior TT numerous times, as well as many other races throughout Europe and the UK. Motorcycle historian Mick Walker tells the story of the various Velocette racing bikes and their riders from 1905 to the winding up of the company in 1971. Velocettes have always had a loyal following and the KTT and Thruxton especially are among the most desirable of classic bikes, especially with a racing pedigree. Riders like Stanley Wood, Neil Kelly, E.A. Mellors and Bertie Goodman all feature in the book too. Famous models such as the KTT, MAC, Venom and Thruxton are looked at in depth, while the story of Velocette's racing heritage is told in great detail in **Velocette: The Racing Story**.

In 1982, at the age of just twenty-three and halfway through her architecture studies, Elspeth Beard left her family and friends in London and set off on a 35,000-mile solo adventure around the world on her 1974 BMW R60/6. Reeling from a recent breakup and with only limited savings from her pub job, a tent, a few clothes and some tools, all packed on the back of her bike, she was determined to prove herself. She had ridden bikes since her teens and was well travelled. But nothing could prepare her for what lay ahead. When she returned to London nearly two and a half years later she was stones lighter and decades wiser. She'd ridden through unforgiving landscapes and countries ravaged by war, witnessed civil uprisings that forced her to fake documents, and fended off sexual attacks, biker gangs and corrupt police convinced she was trafficking drugs. She'd survived life-threatening illnesses, personal loss and brutal accidents that had left permanent scars and a black hole in her memory. And she'd fallen in love with two very different men. In an age before email, the internet, mobile phones, satnavs and, in some parts of the world, readily available and reliable maps, Elspeth achieved something that would still seem remarkable today. Told with honesty and wit, this is the extraordinary and moving story of a unique and life-changing adventure.

Hot Rod Empire details Robert E. Petersen's creation of Hot Rod Magazine in the 1940s and the Petersen Publishing empire that grew to the mainstream juggernaut we know today. The end of World War II marked the release of pent-up war-years energy and the desire to live. For many this meant indulging in long-denied purchases, like a new car. For another group, including young vets, it meant a return to car building and racing. Money, exciting new cars, and speed parts all flowed freely in post-war America. Robert Petersen, a young SoCal-based photographer and Army Air Corps vet, noted the rapidly growing hot rod scene in and around Los Angeles. His first move was to organize the Los Angeles Hot Rod Exhibition in 1948. His second, and brilliant, move was to launch at the same event the first edition of Hot Rod magazine. From this launch pad, Petersen Publishing Company would grow to become the most influential enthusiast publisher in America. Petersen's magazines were rallying points for all aspects of the car, truck, and motorcycle hobbies, well as nurturing and promoting all aspects from car building to racing to show events. Hot Rod, Motor Trend, Car Craft, Motorcyclist, Off-Road and Four Wheel Drive and some 75 other enthusiast titles dominated magazine racks and provided substantial influence over transportation and numerous other hobbies. Hot Rod Empire celebrates the birth and explosive growth of the transportation hobby under Petersen's watch.

For Fluid Mechanics courses found in Civil and Environmental, General Engineering, and Engineering Technology and Industrial Management departments. Fluid Mechanics is intended to provide a comprehensive guide to a full understanding of the theory and many applications of fluid mechanics. The text features many of the hallmark pedagogical aids unique to Hibbeler texts, including its student-friendly, clear organisation. The text supports the development of student problem-solving skills through a large variety of problems, representing a broad range of engineering disciplines that stress practical, realistic situations encountered in professional practice, and provide varying levels of difficulty. The text offers flexibility in that basic principles are covered in chapters 1-6, and the remaining chapters can be covered in any sequence without the loss of continuity. Updates to the 2nd Edition result from comments and suggestions from colleagues, reviewers in the teaching profession, and many of the author's students, and include expanded topic coverage and new Example and Fundamental Problems intended to further students' understanding of the theory and its applications.

Velocette (pronounced velo-set) is an icon of the classic British motorcycle scene. Engineering excellence mattered more than the whims of the market to the Goodman family, owners of Veloce, Ltd., manufacturer of the Velocette motorcycle. This painstakingly assembled book details the history of the machines' development and competition success, as well as the story of the family behind the marque. Run with honesty and integrity, the company gained a loyal following and a reputation for building quality machines before closing its doors in 1971, beset by the economic factors that caused the downfall of the whole of the British motorcycle industry.
