Design of Low-Rise Buildings Subjected to Lateral Forces is a concise guide that identifies performance issues, concerns, and research needs associated with low-rise buildings. The book begins with an introduction that discusses special problems with low-rise buildings subjected to wind and earthquakes. Chapter 2 examines probabilistic methods and their use in evaluating risks from natural hazards. It also addresses the characteristics of wind and seismic

forces and levels of risk implied by building codes. Wind forces are covered in more detail in Chapter 3, with discussions of wind force structure interactions. Chapter 4 is devoted to earthquake forces and traces the development of building codes for earthquake resistant design. Chapter 5 describes the main framing systems used to resist lateral forces and discusses the code requirements for drift control. The designs and requirements for

connections between building elements are addressed in Chapter 6. It includes examples along with several illustrations of wind-suitable connections. The performance of non-structural elements during wind and earthquake forces is also examined in detail. This book serves as an important reference for civil engineers, construction engineers, architects, and anyone concerned with structural codes and standards. It is an excellent guide that can be used

Disaster and Emergency Pharmacy SAGE Publications The Wildland Fire Incident Management Field Guide is a revision of what used to be called the Fireline Handbook, PMS 410-1. This guide has been renamed because, over time, the original purpose of the Fireline Handbook had been replaced by the Incident Response Pocket Guide, PMS 461. As a result, this new

guide is aimed at a different audience, and it was felt a new name was in order. Home Generator: Selecting, Sizing And Connecting The Complete 2015 Guide Jones & Bartlett Learning This book shows students how to build successful new enterprises: to conceive, plan, and execute on a new venture idea. Based on research findings, the authors' own experiences and their work with dozens of young entrepreneurial companies, the book shows how innovation is inextricably linked

with entrepreneurship. It breaks down all the key steps necessary for success, provides in-depth cases of companies from a variety of industries (with a focus on technology firms), and includes Reader Exercises at the end of each chapter that can be used for team activities.

engineer, provides you with the practical information that you need to know in order to choose the right emergency power generator for your needs. The guide discusses standby and portable electric generators in minute detail. It also presents an overview of battery-based backup systems. For each type of electric generators this Home Generator Guide provides principles of operation, pros and cons, lesser known details, charts

with comparative characteristics of the popular brands, cost estimation, step-by-step sizing procedure and transfer switch wiring options. The guide explains some common mistakes made in determining the required generator size. In conclusion the author offers his generator picks depending on your requirements and budget. In addressing humanitarian crises, the international community has long understood the need to extend beyond providing immediate relief, and to engage with long-term recovery activities and the prevention of similar crises in the future.

However, this continuum from short-term relief to rehabilitation and development has often proved difficult to achieve. This book aims to shed light on the continuum of humanitarian crisis management, particularly from the viewpoint of major bilateral donors and agencies. Focusing on cases of armed conflicts and disasters, the authors describe the evolution of approaches and lessons learnt in practice when moving from emergency relief to recovery and

prevention of future crises. Drawing on an extensive research project conducted by the Japan International Cooperation Agency Research Institute, this book compares how a range of international organizations, bilateral cooperation agencies, NGOs, and research institutes have approached the continuum in international humanitarian crisis management. The book draws on six humanitarian crises case studies, each resulting

---

from armed conflict or natural disasters: Timor-Leste, South Sudan, the Syrian crisis, Hurricane Mitch in Honduras, the Indian Ocean earthquake and tsunami in Indonesia, and Typhoon Yolanda. The book concludes by proposing a common conceptual framework designed to appeal to different stakeholders involved in crisis management. Following on from the World Humanitarian Summit, where a

new way of working on the humanitarian-development nexus was highlighted as one of five major priority trends, this book is a timely contribution to the debate which should interest researchers of humanitarian studies, conflict and peace studies, and disaster risk-management. materials, devices and technologies with the reader. The result is a comprehensive overview of electrochemical energy and conversion methods, including batteries, fuel cells, supercapacitors, hydrogen generation and storage as well as solar energy conversion. Each chapter addresses electrochemical processes, materials, components, degradation mechanisms, device assembly and manufacturing, while also discussing the challenges and perspectives for each energy storage device in question. In addition, two introductory chapters acquaint readers with the fundamentals of energy storage and conversion, and with

the general engineering aspects of electrochemical devices. With its uniformly structured, self-contained chapters, this is ideal reading for entrants to the field as well as experienced researchers.

Professional Health Promotion: The Basics  
introduces not only the fundamental theories and key concepts within this important area of health and social care, but translates these into practice for anyone working in the field. The chapters are structured around the WHO's Ottawa Charter (1986)

which underpins the discipline, and cover a comprehensive range of topics. From developing personal skills to understanding government policy, the book looks at health promotion on both an individual and a societal level. It spotlights key topic areas from behaviour change to climate change, as well as exploring how where we live impacts our health, and features practical examples for integrating health promotion into existing service provision and through community action. Including case studies throughout, and further reading for

In this timely book about the

current state of research and practice of emergency management in China, the authors take as their basic premises that we now live in a risk society and that our collective ability to deal with disasters and their aftermath is more important than ever. Set within a multi-disciplinary framework that places risk, disaster and crisis, the three phases of emergency management, on an analytical continuum, and drawing on empirical data obtained through

surveys, observations, and interviews, the study not only provides a thorough overview of recent progress in our theoretical understanding of the subject but also offers insights on how scientifically informed policies can improve the way emergency management is done in China. *Monthly Catalog of United States Government Publications* McGraw Hill Professional Acute Exposure Guideline Levels for Selected Airborne Chemicals,

Volume 15 identifies, reviews, and interprets relevant toxicologic and other scientific data for ethyl mercaptan, methyl mercaptan, phenyl mercaptan, tert-octyl mercaptan, lewisite, methyl isothiocyanate, and selected monoisocyanates in order to develop acute exposure guideline levels (AEGLs) for these high-priority, acutely toxic chemicals. AEGLs represent threshold exposure limits (exposure levels below which adverse health effects are not likely to occur) for the general public and are applicable to emergency exposures ranging from 10 minutes (min) to 8 h. Three level--AEGL-1, AEGL-2, and AEGL-3--are developed for each of five exposure periods (10 min, 30 min, 1 h, 4 h, and 8 h) and are distinguished by varying degrees of severity of toxic effects. This report will inform planning, response, and prevention in the community, the workplace, transportation, the military, and the remediation of Superfund sites.

 On November 13, 1985, catastrophic mudflows swept down the slopes of the erupting Nevado del Ruiz volcano, destroying structures in their paths. Various estimates of deaths ranged as high

as 24,000 residents. Though the nature and extent of risk posed by the mudflows to local communities were well documented before the event and extensive efforts had been made to communicate this information to those at risk, the affected communities were caught largely unaware. This volume analyzes the disaster's many aspects: the extent, constitution, and behavior of the mudflows; the nature of damage to structures; the status of the area's disaster warning system; and the extent of the area's disaster preparedness, emergency response actions, and disaster relief efforts—both at the time of the disaster and in the first few months following the event.

This book intends to bring together and integrate the subject matter of water quality. The book covers aspects of water related to climate change, emerging aspects of engineering sciences, biogeochemical sciences, hydro geochemistry, river management and morphology, social sciences, and public policy. The book covers the role of disruptive innovations in water management,

policy formation and impact mitigation strategies. The book includes lab results as well as case studies. It provides recommendations and solutions for policy making and sustainable water management. The chapters in this book deal cohesively with many aspects of the water environment during the Anthropocene era. The contents cover myriad issues, such as land degradation, water scarcity, urbanization, climate change, and disruptive innovation. The book also discusses issues highly pertinent to society and sustainability, such as the
