But when the handsome Swede runs into his patron's uptight daughter, what he once considered easy money becomes maddeningly complicated... Cursed with deadly spirits as her constant companions, curator Hadley Bacall must keep calm to hold her dangerous specters at bay and prevent them from lashing out at anything—or anyone. When Frank and Kevin first met in an empty Arab airport lounge on their way to India in January 1985, it was the beginning of a friendship which would take them together across the length and breadth of the Indian sub-continent, ending up in the foothills of the Himalayas in Nepal. 'Kevin and I in India' is the unexpurgated, often outrageous, diary of their travels -

from the hill-stations of the deep south to the Taj Mahal in the north, from the Goan beaches of the west to the sacred Ganges and the Bodhi Tree in the east. Full of anecdotes, observations and travellers' tales, the two Englishmen weave a crazy, erratic path through a variety of adventures and misadventures, in constant battle against officialdom, insects, heat, dust, ticket-queues and mad traffic. Here is the real India - stripped of illusion, but adorned with humour and exuberance. Here is a kaleidoscopic potpourri of fascinating sights, scenes and people, with each day of the journey more exciting, more packed with incident, than the last.

This book offers a broad, cohesive overview of the field of data privacy. It discusses, from a technological perspective, the problems and solutions of the three main communities working on data privacy: statistical disclosure control (those with a statistical background), privacy-preserving data mining (those working with data bases and data mining), and privacy-enhancing technologies (those involved in communications and security) communities. Presenting different approaches, the book describes alternative privacy models and disclosure risk measures as well as data protection procedures for respondent, holder and user privacy. It also discusses specific data privacy problems and solutions for readers who need

to deal with big data.
