Is there really a human race? Is it going on now all over the place? When did it start? Who said, "Ready, Set, Go"? Did it start on my birthday? I really must know. With these questions, our hero's imagination is off and running. Is the human race an obstacle course? Is it a spirit? Does he get his own lane? Does he get his own coach? Written with Jamie Lee Curtis's humor and heart and illustrated with Laura Cornell's worldly wit, *Is There Really a Human Race?* Is all about relishing the journey and making good choices along the way—because how we live and how we love is how we learn to make the world a better place, one small step at a time.

A new collection of philosophical biographies of key figures in Black Southern American social and political thought Frederick Douglass, Booker Washington and Ida Wells. Thurgood Marshall and Martin King are focused upon, together with Howard Thurman, Richard Wright, Fred Gray and Barbara Jordan. All are important in various ways to the movements this book seeks out. From the perspective of liberation, the two high points in the African-

American Odyssey are marked by Emancipation in the nineteenth century and Desegregation in the twentieth. Douglass bestriding the first, King and Marshall the second. The thread of resistance runs through most of these philosophical profiles, and the thread of non-violence, with greater or less force, also runs throughout. This volume assumes a distinction between (a) an earlier period when Afro-America was more cohesive and collectively committed to self-improvement despite the odds, and (b) the contemporary period, beyond desegregation, marked by rates never previously rivaled of suicide, joblessness, imprisonment, despair and alienation, especially among black poor. The life stories and philosophies presented here make fascinating reading. This book is a Special Issue of the leading journal, *Critical Review of International Social*

Welcome to Pava, a city where miniaturized show-dragons are pitted against each other in secret, forbidden tournaments, and magic has been outlawed by a cruel child dictator. Here lives Petra K, the daughter of a shut-in mother, who becomes the master of a dragonka everyone wants to get their hands on. In a complicated world of sorceresses, gypsies, child gangs, and secret police, Petra K needs to decide whom to trust, and whom to betray in order to keep herself and her pet safe. But revolution is in the air, and she too is caught up in its pull. Only the Blackhearts, a gang of orphan children, dare to defy the new dictator's rule, selling potions to survive. Along with the Blackhearts, Petra K faces a

murderous pack of mechanical dragonka, a phantom secret agent—and, most harrowing, her own weaknesses. Will the Blackhearts' adventures and courage inspire the terrified population to rise up again, and return Pava to a place of prosperity, where dragonka run free? Petra K and the Blackhearts is the first thrilling book of a trilogy by M. Henderson Ellis, whose previous novel Booklist called "a wild, manic ride . . . thoroughly enjoyable." From the Trade Paperback edition.

**About the Book:** This book is an attempt to consolidate the basic scientific studies in the machining area so that fundamental mechanics and other concepts related to primary machining processes could be understood. The book is essentially designed for senior undergraduate mechanical and production

engineering students but practicing engineers will also find it useful for tool and product design. The topics covered include plastic deformation, chip formation, tool geometry, mechanics of orthogonal and oblique cutting, measurement of cutting force, cutting temperature, tool wear and tool life, economics of machining, grinding of metals and machining vibrations. The analyses presented have been illustrated through numerical examples. Review questions and bibliography are also included. **About the Author:** Dr. G.K. Lal has been associated with the Indian Institute of Technology, Kanpur for the past 34 years. He retired as a Professor of Mechanical Engineering in 2003 and had earlier held the positions of

---

Dean (1976-80) and Deputy Director (1982-88). Before joining IIT Kanpur he had taught at the Banaras Hindu University and held research positions at the University of Sherbrooke (Canada) and the Carnegie-Mellon University (USA). He also worked as a Design Engineer with the Abitibi Paper and Power Corp. of Canada.
