equipment Simon and Schuster Growing up in a small seaside town, Marcie Brooks dreams of owning a Mary Quant mini-skirt, the Beatles, and escape. Instead she's stuck in a dead-end job selling candy floss to tourists and with a crazy family. Her grandmother sees ghosts, her step-mother is unable to control her growing family and Marcie's father is usually in and out of prison or away 'working' for East End gangsters. Despite it all, Marcie adores her father, but Tony's light fingers and hard man reputation mean most people give the Brooks family a wide berth. Sometimes Marcie even wishes she had a respectable dad like her friend Rita; well-groomed, wealthy by local standards and surprisingly attentive to a teenage girl. But when she discovers Tony may have had something to do with her real mother's death, Marcie finds her friend's father is more than just a shoulder to cry on... Mia Dolan's novels will appeal to all saga readers, especially fans of Katie Flynn . **Small Engine Manual** Createspace Independent Publishing Platform **Named One of the New York Post's Best New Books to Read ** FIRE IN THE STRAW is the witty and deeply felt memoir of Nick Lyons, a man with an intrepid desire to reinvent himself—which he does, over and over. Nick Lyons shape shifts from reluctant student and graduate of the Wharton School, to English Professor, to husband of a fiercely committed painter,

to ghost writer, to famous fly fisherman and award-winning author, to father and then grandfather, to Executive Editor at a large book publishing company, and finally to founder and publisher of his own successful independent press.. Written with the same warm and earthy voice that has enthralled tens of thousands of fly-fishing readers, Nick weaves the disparate chapters of his life: from the moment his widowed mother drops him off at a grim boarding school at the age of five, where he spends three lonely and confusing years; to his love of basketball and pride playing for Penn; to the tumultuous period, in the army and after, when he found and was transformed by literature; to his marriage to Mari, his great love and anchor of his life. Suddenly, with a PhD in hand and four children, Nick embarks on a complex and thrilling ride, juggling family, fishing, teaching, writing, and publishing, the wolf always at his door. Against all odds, The Lyons Press survives, his children prosper, his wife's art flourishes, and his books and articles make him a household name. Fire in the Straw is a love story, a confessional, and a beautiful big-hearted memoir. Rock A Bye Baby Courier

Ressentiment—the hateful desire for revenge—plays a pivotal role in Nietzsche's *On the Genealogy of Morals*.

Ressentiment explains the formation of bad conscience, guilt, asceticism, and, most importantly, it motivates the "slave revolt" that gives rise to Western morality's values. Ressentiment, however, has not enjoyed a thorough treatment in the secondary literature. This book brings it sharply into focus and provides the first detailed examination of Nietzsche's psychology of resentment. Unlike other books on the *Genealogy*, it uses resentment as a key to the *Genealogy* and focuses on the intriguing relationship between resentment and justice. It shows how resentment, despite its blindness to justice, gives rise to moral justice—the central target of Nietzsche's critique. This critique notwithstanding, the *Genealogy* shows Nietzsche's

enduring commitment to the virtue of non-moral justice: a commitment that grounds his provocative view that moral justice spells the 'end of justice'. The result provides a novel view of Nietzsche's moral psychology in the *Genealogy*, his critique of morality, and his views on justice.

Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer's personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as: • physical principles of various material handling systems; • considerations in selecting technically efficient and environmentally friendly equipment; • best practices in upgrading and

optimizing existing bulk material handling facilities; • strategies to select proper equipment in the early phases of a new project. Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.

Papua New Guinea is commonly thought to be a land without railways. At the very least, railways do not immediately come to mind as a topic for historical research in Papua New Guinea. Nevertheless, we set out to document and record something of the history of local railways in 1971, initially as individual projects. Inevitably, our interest in the topic of railways brought us together and we have been working collaboratively on our research since 1980. At first the task was to identify and document the railways which have operated in Papua New Guinea. To our surprise, we now have records of some 150 railway lines, many of them small hand-pushed operations from a jetty to a copra store or around a sawmill. Others have yielded fascinating stories of more substantial enterprises and the endeavours of colonial pioneers at the frontier. As

we brought the material together we began to realise that we not only had stories about small railway operations around the country, but we also had the basis for a new look at some basic elements of Papua New Guinea economic history. Through the story of railways we had identified important themes which helped us learn about the economic conditions of today from the experience of the past.
