Welcome to the Sixth Terrace of Dante's tower of Purgatory, serving up sins of gluttony in an eternal banquet. On this carefully curated menu you'll find children stuffing themselves to death, a forgotten saviour gorging on cheeseburgers between bareknuckle rounds on the roadhouse circuit, wealthy socialites revel in an orgiastic alien feast,

and the end of days as seen through an apocalyptic carnival of indulgence. Excessive consumption also manifests in darker hungers, for cruelty, for distraction, or possession. A pair of grifters bent on having it all chase a Scottish leprechaun across the English countryside, a newly deceased addict vies for the attention of Heavenly Higher Ups, degenerate poker players gamble with unforeseen currency, and when an old lady swallows a fly, it's just the beginning... Featuring nine stories of grotesque appetite and glorious excess from a gory gaggle of creators, they say too much of anything is poison, yet these condemned swallow each piece of forbidden fruit while reaching for the next, never to be sated. They can't help themselves. Can you?

Uncover Effective Engineering Solutions to Practical Problems With its clear explanation of fundamental principles and emphasis on real world applications, this practical text will motivate readers to learn. The author connects theory and analysis to practical examples drawn from engineering practice. Readers get a better understanding of how they can apply these concepts to develop engineering answers to various problems. By using simple examples that

illustrate basic principles and more complex examples representative of engineering applications throughout the text, the author also shows readers how fluid mechanics is relevant to the engineering field. These examples will help them develop problem-solving skills, gain physical insight into the material, learn how and when to use approximations and make assumptions, and understand when these approximations might break down. Key Features of the Text * The underlying physical concepts are highlighted rather than focusing on the mathematical equations. * Dimensional reasoning is emphasized as well as the interpretation of the results. * An introduction to engineering in the environment is included to spark reader interest. * Historical references throughout the chapters provide readers with the rich history of fluid mechanics.

The true secret to weight-loss success is all in your head. Nordine Zouareg has helped thousands of clients get healthier, be happier, and lose weight for good. And in the process, he's discovered something astounding: the mental work his clients do before they start their diet and exercise plan is actually just as (if not more) important than the plan itself. In Mind Over Body, Nordine describes how everyone can find this mental motivation -- what he calls our "core desire" -- and then master the tools (visualization, meditation, affirmation) to keep on track with weight-

loss goals. After readers develop this foundation, they move on to the inspiring nutrition and exercise plan--a simple, effective program developed to help shed weight and keep it off forever. You'll learn: The fool-proof method for preparing your mind -- and your body -- before you diet Thirty delicious foods that are the staples of the Mind Over Body eating plan When to cheat -- without blowing your diet How to get an effective workout in just 24 minutes a day The 10 commandments of mindful strength training As the fitness coach at Miraval Life in Balance spa, Nordine has worked with celebrities, business leaders, discerning travelers, and soccer moms all across North America. Rated the #1 spa by Conde Nast Traveler, the #1 destination spa by Travel and Leisure, and the top spa in America by Zagat, Miraval has become the premier destination for bringing people's lives into balance and teaching them how to live mindfully. From Sia to Elton John, from Billie Holiday to David Bowie, LGBT musicians have changed the course of modern music. But before their music—and the messages behind it—gained understanding and a place in the mainstream, how did the queer musicians of yesteryear fight to build foundations for those who would follow them? David Bowie Made Me Gay is the first book to cover the breadth of

history of recorded music by and for the LGBT community. Darryl W. Bullock reveals the stories of both famous and lesser-known LGBT musicians, whose perseverance against the threat of persecution during decades of political and historical turmoil—including two world wars, Stonewall, and the AIDS crisis—has led to some of the most significant and soul-searching music of the last century. Bullock chronicles these struggles through new interviews and archival reports, dating from the birth of jazz in the red-light district of New Orleans, through the rock 'n' roll years, Swinging Sixties, and disco days of the '70s, right up to modern pop, electronica, and reggae. An entertaining treasure-trove of untold history for all music lovers, David Bowie Made Me Gay is an inspiring, nostalgic, and provocative story of right to be heard and the need to keep the fight for equality in the spotlight. The second edition of MECHANICS OF MATERIALS by Pytel and Kiusalaas is a concise examination of the fundamentals of Mechanics of Materials. The book maintains the hallmark organization of the previous edition as well as the time-tested problem solving methodology, which incorporates outlines of procedures and numerous sample problems to help ease students through the transition from theory to problem analysis. Emphasis is placed on giving students the introduction to the field that they need along with the problem-solving skills that will help them in their subsequent studies. This is demonstrated in the text by the presentation of fundamental principles before the introduction of

advanced/special topics. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

British Defence Minister Robert Greeves -

vanished without a trace. In a luxury private safari lodge in Kruger National Park, Detective Sergeant and Protection Officer Tom Furey can't believe this happened on his watch, when he had his eye on a pretty girl rather than on the job. Knowing his career is on the line, Furey vows not to stop until Greeves is found - dead or alive. He and his South African counterpart, the attractive Inspector Sannie Van Rensburg, go against official orders and start the search for the suspected band of terrorists through the outer limits of the National Park to the coastal waters of Mozambique. Tom must assume nothing and trust no one, as the silent predator is about to pounce.

This book explores the experiences of older women in post-war Japanese society through analysis of their family and housing histories. Three broad themes - family relations, welfare systems and housing - were chosen to highlight issues surrounding the changing role and position of women in the family and society. A qualitative approach is used to address a gap in the literature and to illustrate the real-life experiences of women in Japan. Many aspects of the book are comparable, or related, to studies exploring other industrial and East Asian societies and the book thus contributes to international debates surrounding housing policy, the ageing society and the changing nature of the family. It also provides useful insights into and analysis of, Japan ' s society and socio-

economic system.
