Atoms and molecules in all states of matter are subject to continuous irregular movement. This process, referred to as diffusion, is among the most general and basic phenomena in nature and determines the performance of many technological processes. This book provides an introduction to the fascinating world of diffusion in microporous solids. Jointly written by three well-known researchers in this field, it presents a coherent treatise, rather than a compilation of separate review articles, covering the theoretical fundamentals, molecular modeling, experimental observation and technical applications. Based on the book Diffusion in Zeolites and other Microporous

Solids, originally published in 1992, it illustrates the remarkable speed with which this field has developed since that time. Specific topics include: new families of nanoporous materials, micro-imaging and single-particle tracking, direct monitoring of transient profiles by interference microscopy, single-file diffusion and new approaches to molecular modeling.

Yeh-Shen, the Toad

Bridegroom Benchmark Education Company Working Guide to Drilling Equipment and Operations offers a practical guide to drilling technologies and procedures. The book begins by introducing basic concepts such as the functions of drilling muds; types of drilling fluids;

testing of drilling systems; and completion and workover fluids. This is followed by discussions of the composition of the drill string; air and gas drilling operations; and directional drilling. The book identifies the factors that should be considered for optimized drilling operations: health, safety, and environment; production capability; and drilling implementation. It explains how to control well pressure. It details the process of fishing, i.e. removal of a fish (part of the drill string that separates from the upper remaining portion of the drill string) or junk (small items of non-drillable metals) from the borehole. The remaining chapters cover the different types of casing and casing string design; well cementing; the proper design of tubing; and the environmental aspects of drilling. Exploring Nature A1 Success Books

This book explores the experiences of older women in post-war Japanese society through analysis of their family and housing histories. Three broad themes - family relations, welfare systems and housing - were chosen to highlight issues surrounding the changing role and position of women in the family and society. A qualitative approach is used to address a gap in the literature and to illustrate the real-life experiences of women in Japan.

Many aspects of the book are comparable, or related, to studies exploring other industrial and East Asian societies and the book thus contributes to international debates surrounding housing policy, the ageing society and the changing nature of the family. It also provides useful insights into and analysis of, Japan ' s society and socio-economic system.
