This book consists of two titles, which are the following: Book 1: In this guide, you will learn about all the basics of artificial intelligence. You'll learn what it is, how it works, and where it came from (or, in other words, how it all started). Aside from that, we'll dive into some data analytics and examples of artificial intelligence. We'll cover several steps in the analytical process, and see what it takes for artificial intelligence to be effective. This book starts off with a question and answer section about artificial intelligence. It then proceeds to cover specific artificially intelligent applications, such as chatbots and robotics. These pages will show details of things that puzzle many people's minds. But you won't be left in the dark and will enjoy the full benefits of this knowledge.

This third book by popular log-home authors Cindy Thiede and Art Thiede brings the scale of log homes back to practical reality. It features owner-built homes, recycled log homes, and historical renovations. The Thiedes also show some stunning examples of personal details that make a home stand out. In addition, log builder Art Thiede lead teh reader through the steps of designing and constructing a small log building. Filled with exceptional color photographs of log homes that reflect the personalities and lifestyles of their owners, Hands-on Log Homes tells of people with extraordinary stories of determination and purpose. Most of them had regular jobs and regular incomes, but for many, a handcrafted log home would not have been financially possible without the generous infusion of their own sweat equity. For others, taking on a house-building project with logs was the opportunity to challenge their own resourcefulness, vent powerful creative energy, and say loud and clear, "Yes, I can!" Cindy Thiede and her husband, Art Thiede, have spent almost twenty years photographing and writing about log-home architecture in the United States. Not only have the couple designed, built, and recycled log homes for themselves and other clients, but they have crisscrossed the country three times over in their efforts to study and document the architectural legacy of logs.
