*The art of rigging* Dr.

Madonna Taylor Higgs

This text provides a teachable and readable approach to transport phenomena (momentum, heat, and mass transport) by providing numerous examples and applications, which are particularly important to metallurgical, ceramic, and materials engineers. Because the authors feel that it is important for students and practicing engineers to visualize the physical situations, they have attempted to lead the reader through the development and solution of the relevant differential equations by applying the familiar principles of conservation to numerous situations and by including many worked examples in each chapter. The book is organized in a manner characteristic of other texts in transport phenomena. Section I deals with the properties and mechanics of fluid motion; Section II with thermal properties and heat transfer; and Section III with diffusion and mass transfer. The authors depart from tradition by building on a presumed understanding of the relationships between the structure and properties of matter, particularly in the

chapters devoted to the transport properties (viscosity, thermal conductivity, and the diffusion coefficients). In addition, generous portions of the text, numerous examples, and many problems at the ends of the chapters apply transport phenomena to materials processing.

No matter what anyone tells you, boat cooking IS different from cooking ashore. The space is smaller, there ' s no grocery store 5 minutes away, you have fewer prepared foods and electric appliances, and food storage is much different. Despite cruising different oceans, we—Jan and Carolyn--both faced the same challenges: eating well while having time to enjoy all the other great aspects of cruising. We love to snorkel, swim, kayak, explore—and just sit and admire the view. We learned with the cookbooks we both had aboard, and wished for

---

information that wasn't available--like when Jan ended up with a frozen chicken complete with head and feet and no instructions on how to cut it up. When we couldn't get foods such as sour cream, English muffins, spaghetti sauce or yogurt, we adapted recipes to make our own. Other times, we experimented with substituting ingredients--maybe the result wasn't identical, but it was still tasty. We ended up with over 150 substitutions and dozens of "make it yourself" options. As we traded recipes and knowledge with each other, we realized we were compiling information that became *The Boat Galley Cookbook*: 800+ recipes made from readily-obtainable ingredients with hand utensils, including numerous choices to suit every taste: not just one cake but 20, 16 ways to prepare fish, 10 regional barbeque sauces, and so on. Step-by-step directions to give even "non-cooks" the confidence they can turn out tasty meals without prepared foods. Detailed instructions on unfamiliar things like making yogurt and bread, grilling virtually every food imaginable, preparing and cooking freshly-caught fish and seafood, cutting up and boning meat, cooking in a Thermos and baking on the stove top, as well as lots of tips on how to do things more easily in a tiny, moving kitchen. All this in an easy-to-navigate format including side tabs on the Contents to help you find your way and extensive cross reference lists at the end of each chapter. Quick Reference Lists provide idea starters: suggestions of included recipes for such categories as Mexican, Asian, and Potluck. *The Boat Galley Cookbook* is designed to help you every step of the way. We hope it becomes a trusted reference on your boat, and a source of many enjoyable meals.

Providing readers with a robust, practical understanding of how young children build knowledge, this book offers a critical examination of the ways traditional homework fails young children, and how alternatives can better build collaborative engagement with families while supporting learning across all content areas. Grounded in culturally sustaining practices, the first section breaks down the pedagogies that support deep learning, while later chapters emphasize the role of critical and creative thinking, project-based learning, and student choice in the development of engaging, personally relevant home learning experiences. *Embracing Alternatives to Homework in Early Childhood* is a critical text for anyone seeking to reimagine homework practices as both equitable and agency-building in PreK-3.

For Maiden Voyage guitarist, Ryder Hampton, life is great. He and his bandmates are embarking upon an epic European double headlining tour with their friends from Social Sinners with the band Embrace the Fear opening for them. Since joining Maiden Voyage in his twenties, Ryder's life has been a whirlwind of the cliched, "Sex, drugs and monumental doses of Rock 'n Roll. And he's loved every minute of it from the sold out shows to the revolving door of bed partners. Max Hightower has always been a team player. Whether it was working with his team in the Marines or now with the private security company, Ventura Security. These days, his job was to have the backs of a band of musicians. One band member in particular he'd allowed to get too close and now emotions were involved. Ryder Hampton had left his mark on Max's closed-off heart and now Max's job was in jeopardy. Falling for your principal

wasn't safe - nor smart. Neither was missing the mark on protecting him and now Max was guilty of both. The security detail he'd begged his boss for had turned out to be the one that could ruin him and shatter his heart too. Max couldn't allow either option to happen. Maiden Voyage series must be read in order as each book starts where the last one ended but is from another band members point of view: 1 - Ryder's Guardian 2 - Derek's Destiny 3 - Jaxson's Nemesis 4 - Shadow's Light
