What makes a man sell all he owns and ride a motorcycle 22,000 miles from his hometown in upstate New York to the southernmost tip of South America? Some call it craziness; Latinos call it "cojones." This funny, fast-paced narrative follows a young man in his search for meaning, adventure, and the best rum in Latin America. Battling rough roads, careening buses, and bribe-taking cops in 14 countries, he discovers breathtaking beauty as well as what it feels like to hit a truck head-on. He and his companions for much of the trip--two bikers he met over the Internet--form an unlikely

and amusing trio. In the tradition of "Road Fever" and "Motorcycle Diaries," Odyssey to Ushuaia is a riot for every reader, and absolutely essential for those planning a similar trip. Loaded with insider information such as how to bribe cops and not lose one's savings, how to cross a border without going crazy, how to handle an accident, and much more, it also features an appendix with the detailed trip lists from all three riders.

In an age of mounting energy crises, James A. Fay and Dan S. Golomb's Energy and the Environment offers a timely treatment of a critical

problem in urban-industrial societies: the worldwide growth of energy use and the destructive relationship between this energy use and environmental degradation. This comprehensive text provides the scientific and technological background for understanding how our ever-increasing use of energy threatens the natural environment at local, regional, and global scales and how this threat could be mitigated by more efficient use of conventional energy sources and their replacement by renewable energy sources. Designed for upper-level undergraduate and first-year graduate students, *Energy and the Environment* is essential reading for students and professionals in energy and environmental sciences and technology. Features

- Describes energy technologies and their effectiveness in transforming fossil, nuclear, and renewable energy into useful mechanical or electrical power
- Emphasizes the generation of electric power and the technological improvements that increase power generation efficiency and reduce air pollutant emissions from power plants
- Examines the use of energy in the transportation sector and how vehicle design and engine efficiency improvements could reduce fuel use and pollutant emissions
- Objectively surveys the field of renewable energy technologies and the prospects of increasing the share of renewable energy among all energy sources
- Analyzes the energy sources of toxic emissions to air, water, and land and their effects on environmental quality at local and regional scales
- Examines global climate change, energy consumption's contribution to it, and the salient technologies being developed to mitigate this effect
- Equips engineering majors, science majors, and professionals with the basic facts needed to develop solutions to these pressing environmental problems

The bestselling citizen's guide to economics *Basic Economics* is a citizen's guide to economics, written for those who want to understand how the

economy works but have no interest in jargon or equations. Bestselling economist Thomas Sowell explains the general principles underlying different economic systems: capitalist, socialist, feudal, and so on. In readable language, he shows how to critique economic policies in terms of the incentives they create, rather than the goals they proclaim. With clear explanations of the entire field, from rent control and the rise and fall of businesses to the international balance of payments, this is the first book for anyone who wishes to understand how the economy functions. This fifth edition includes a new chapter explaining the reasons for large differences of wealth and income between nations. Drawing on lively examples from around the world and from centuries of history, Sowell explains basic economic principles for the general public in plain English.

A new edition of the classic bestseller from the original authors, with additional material specifically prepared for Canadian readers by long-time This Morning CBC producer, Ira Basen, and Jane Farrow, the author of *Wanted Words*. In 1977, a publishing sensation was born. *The Book of Lists*, the first and best compendium of facts weirder than fiction, was published. Filled with intriguing information and must-talk-about trivia it has spawned many imitators – but none as addictive or successful. For nearly three decades since, the editors have been researching curious facts, unusual statistics and the incredible stories behind them. Now the most entertaining and informative of these have been brought together in a long-awaited, thoroughly up-to-date new edition that is also the first Canadian edition. Ira Basen and Jane Farrow have augmented the existing lists with fascinating homegrown material, and compiled lists specifically of relevance to Canadian readers. So if you've always wanted to find out how porcupines really mate, how comedy can kill and – that most essential piece of knowledge – how long the longest recorded nose was, this is the book for you. With contributions from a variety of celebrities and experts including Margaret Atwood, Mike Myers, Michael Ondaatje, Dave Eggers, Phillip Pullman and Charlotte Gray, this anthology has something for everyone – and more than you ever suspected you wanted to know. A list of lists from *The Book of Lists*: 10 Notable Film Scenes Left on the Cutting Room Floor 10 Afflictions and Their Patron Saints 14 Nations with More Sheep Than People 5 Trips to the Canadian Wilderness That Ended in Disaster 10 Really Bad Canadian Sports Teams 14 Last Words of Famous Canadians Kurt Browning's 9 Turning Points in Figure Skating History 7 Trial Verdicts That Caused Riots 12 Museums of Limited Appeal 10 Unusual Canadian Place Names That Start with a "B" 7 Well-Known Sayings Attributed to

For his eighth birthday, Emilio Scotto received a World Atlas. Promptly he announced his plan to make a route that would pass through all the countries of the world, a route he named BLUE ROAD ONE. When, some years later, he found himself astride a black 1100 Honda Gold Wing motorcycle, Blue Road One beckoned, and Scotto set off on a journey that would last more than a decade, take him virtually everywhere in the world, and land him in the Guinness Book of World Records. This is his story, a thrill ride that begins in his native Argentina, crosses Panama in the tumultuous time of Noriega, Mexico in the midst of an earthquake, and finds him broke in L.A. where, in a chance meeting, Muhammad Ali gives him fifty dollars and a signed book. Breaching the Iron Curtain, crossing the Berlin Wall at Checkpoint Charlie, being blessed by the Pope, set upon by cannibals in Sierra Leone, fleeing Somalia on a freighter, Scotto's adventures would be unbelievable if they weren't true. His tale of touring the world from Tunisia to Turkey, Petra to Afghanistan, Yugoslavia to Singapore, traveling miles enough to take him to the moon and back, is unlike any ever told. Come along, for the ride of a lifetime.
