Although this guide is specific to the Honda S2000 KW V3 shock the basics will apply to any double adjustable (compression & rebound) shock. The KW V3 has separate adjusters for low speed compression and low speed rebound damping. High speed damping is handled by two separate nonadjustable blow off valves.

**All you need to know about tuning the Honda F Series engine**

Honda's answer to the MX-5 wasn't to join it but beat it into submission with its astonishing S2000, offering 240 bhp from a race-bred four-cylinder engine without a turbo in sight. When a company like Honda decides to build something special to shout about its 50 years in business then you know the result is going to be impressive and so it was when the wraps came off the S2000 in 1999.
