WWII history."—Maggie Leffler, international bestselling author of *The Secrets of Flight* In the bestselling tradition of *Hidden Figures* and *The Wives of Los Alamos*, comes this riveting novel of the everyday people who worked on the Manhattan Project during World War II. In November 1944, eighteen-year-old June Walker boards an unmarked bus, destined for a city that doesn't officially exist. Oak Ridge, Tennessee has sprung up in a matter of months—a town of trailers and segregated houses, 24-hour cafeterias, and constant security checks. There, June joins hundreds of other young girls operating massive machines whose purpose is never explained. They know they are helping to win the war, but must ask no questions and reveal nothing to outsiders. The girls spend their evenings socializing and flirting with soldiers, scientists, and workmen at dances and movies, bowling alleys and canteens. June longs to know more about their top-secret assignment and begins an affair with Sam Cantor, the young Jewish physicist from New York who oversees the lab where she works and understands the end goal only too well, while her beautiful roommate Cici is on her own mission: to find a wealthy husband and escape her sharecropper roots. Across town, African-American construction worker Joe Brewer

knows nothing of the government ' s plans, only that his new job pays enough to make it worth leaving his family behind, at least for now. But a breach in security will intertwine his fate with June ' s search for answers. When the bombing of Hiroshima brings the truth about Oak Ridge into devastating focus, June must confront her ideals about loyalty, patriotism, and war itself.

modified or repaired areas only. This new AD adds new inspections for cracking of the fuselage skin along certain chem-milled lines, and corrective actions if necessary. This new AD also reduces certain thresholds and intervals required by AD 2004-18-06. This AD was prompted by new findings of vertical cracks along chem-milled steps adjacent to the butt joints. We are issuing this AD to detect and correct fatigue cracking of the skin

panels, which could result in sudden fracture and failure of the skin panels of the fuselage, and consequent rapid decompression of the airplane.
