...

The VISTA-20P system can control two independent areas of protection (known as partitions) for use by independent users, if desired, by simply assigning zones to one or the other partition during zone programming. The VISTA-20P, by default, automatically distributes users between the two partitions.

Zone numbers (points of detection) are displayed at the keypad when an alarm or trouble condition occurs. ? Partitions (VISTA-20P Series) provide two independent areas of detection plus an optional common zone area, with each partition containing a group of zones that can be armed and disarmed without affecting other zones or users. ?Function keys may have been programmed to perform various functions.

For 20P or 21iP, you have to select partition 1 or 2 and then press *. The system will automatically pick the lowest zone of the highest consecutive 4 zone set and display that on the screen. It is a good idea to write that zone number down so that you have it for easy reference later.
