Our digital library saves in multiple countries, allowing you to get the most less latency time to download any of our books like this one.

Kindly say, the Honeywell Galaxy 2 Series User Guide is universally compatible with any devices to read

InfoWorld Oxford University Press

In 1994 a computer program called the Mosaic browser transformed the Internet from an academic tool into a telecommunications revolution. Now a household name, the World Wide Web is part of the modern communications landscape with tens of thousands of servers providing information to millions of users. Few people, however, realize that the Web was born at CERN, the European Laboratory for Particle Physics, in Geneva, and that it was invented by an Englishman, Tim Berners-Lee. This new book, published in the Popular Science list in Oxford Paperbacks, tells how the idea for the Web came about at CERN, how it was developed, and how it was eventually handed over for free for the rest of the world to use. This is the first book-length account of the Web's development and it includes interview material with the key players in the story.

The remarkable progress in algorithms for machine and deep learning have opened the doors to new opportunities, and some dark possibilities. However, a bright future awaits those who build on their working methods by including HCAI strategies of design and testing. As many technology companies and thought leaders have argued, the goal is not to replace people, but to empower them by making design choices that give humans control over technology. In Human-Centered AI, Professor Ben Shneiderman offers an optimistic realist's guide to how artificial intelligence can be used to augment and enhance humans' lives. This project bridges the gap between ethical considerations and practical realities to offer a road map for successful, reliable systems. Digital cameras, communications services, and navigation apps are just the beginning. Shneiderman shows how future applications will support health and wellness, improve education, accelerate business, and connect people in reliable, safe, and trustworthy ways that respect human values, rights, justice, and dignity.
