S'il existe depuis près de trente ans, ce n'est que récemment, et grâce aux

évolutions technologiques notamment (miniaturisation, baisse des prix, apparition des smartphones et tablettes...), que le monde de la domotique est devenu accessible au plus grand nombre – tant dans son coût que dans son installation.

### LE GUIDE DE RÉFÉRENCE DE LA MAISON CONNECTÉE

Que vous habitiez dans un appartement ou une maison, des dizaines d'objets connectés se proposent aujourd'hui d'entrer dans vos foyers pour faciliter vos tâches du quotidien : un thermostat intelligent augmentera ou baissera la température en fonction de vos allées et venues, des automatismes permettront de fermer votre store automatiquement à une certaine heure, un robot pourra tondre la pelouse ou passer l'aspirateur, des ampoules connectées, commandées par votre smartphone, changeront la couleur des lumières de votre salon, ou encore simuleront une présence pour dissuader les cambrioleurs... Tout ceci n'est pas de la science-fiction, le matériel existe bel et bien à des prix abordables, et surtout, il est simple d'installation et d'utilisation. Pourquoi parler d'objets connectés et de domotique dans un même ouvrage ? La raison est simple : la domotique est l'ensemble des objets connectés rendant la maison elle-même connectée, ou communicante. On parle même parfois de maison intelligente, ces différents objets connectés permettant à la maison de

réagir automatiquement en fonction d'événements (fermer les volets en cas tempête, passer en mode éco du chauffage lors d'une absence imprévue...). L'objectif de cet ouvrage, illustré et pratique, est de faire le point sur ce que propose aujourd'hui le marché en termes de domotique et d'objets connectés. Il vous accompagnera dans le choix d'une solution adaptée à vos besoins et vous permettra de combiner économies d'énergies, confort et sécurité. Issu d'une formation financière, Cédric Locqueneux a été contrôleur de gestion, puis responsable informatique pendant huit ans. Passionné de nouvelles technologies, il a lancé un blog sur la domotique alors qu'il construisait sa propre maison, il y a huit ans. Son blog ([www.maison-et-domotique.com](http://www.maison-et-domotique.com)) est devenu un webzine de référence dans le domaine, avec plus de 300 000 visiteurs uniques et plus d'un million de pages vues chaque mois. Cédric Locqueneux est également aujourd'hui l'un des administrateurs de la Fédération française de domotique, et travaille chez Domadoo, une société revendant de l'équipement domotique. À qui s'adresse cet ouvrage ? Au grand public qui souhaite rendre sa maison ou son appartement « intelligent » À celles et ceux qui veulent simplement améliorer la sécurité de leur logement À celles et ceux qui désirent gagner en confort, pour eux ou leurs proches Et enfin à tous ceux qui souhaitent réaliser

des économies grâce à la domotique
