Robes and Honor is a fascinating exploration of the possible common origin and subsequent developments of investiture across medieval Christianity and medieval Islam. The ceremony in all of its cultural variety was much more than the public adoption of a high-value textile as symbol of office; within a culture, robing established a personal link 'from the hand' of the giver - king, pope, head of a sect, ambassador - to the receiver - noble, general, official, nun, or acolyte. This volume challenges current thinking on religious and regional boundaries of 'cultures,' raises semiotic issues about imagined

communities, and addresses problems of kingship.

A high-level insider's history of the efforts to resolve the Israeli-Palestinian conflict, from 2000 Camp David Talks to the present, that explains why successive attempts have all failed. The clash between Israel and Palestine has been one of the most

emotionally engaging causes of modern times. Prophets without Honor tells the story of the grueling attempts to solve the conflict and examines the reasons for its resilience. Shlomo Ben-Ami, who participated at a high level in the July 2000 Camp David peace talks that almost led to a historic deal, uses his insider experience to

---

illuminate the specific factors that impede a solution to the conflict. He finds that the occupation's traits of permanence, Israel's insatiable quest for Lebensraum, and a hopelessly fragmented and disoriented Palestinian national movement are to blame. Ben-Ami challenges the funereal historiography that emerged in the wake of the Camp David process, when--for the first time ever--Israelis and Palestinians engaged in the Sisyphean task of breaking the taboos surrounding the conflict. The Clinton Peace Parameters that emerged out of this process eventually became the litmus test of every serious peace proposal in the future. But ill-conceived perceptions of the other party, all-or-nothing theological fanaticism, and a lack of bold and enlightened leadership have made these attempts at peace-making a defining failure of the two-state concept. Ben-Ami scrutinizes the ominous alternatives to the two-state solution, such as the binational state, a unilateral pullout from much of the West Bank, and Donald

Trump's Deal of the Century. He also examines the merits of a Jordanian-Palestinian solution. In discussing Palestine from a comparative perspective, he underlines its singularity while also shedding light on the dilemmas that stand at the center of any peace enterprise. Ultimately, his account is the most non-partisan,

comprehensive, and balanced written by an insider representing one of the parties. *Studies in the History of the Exact Sciences in Honour of David Pingree* BRILL Honor Bound is the result of a fruitful collaboration between Stuart I. Rochester and Frederick Kiley. In examining the lives of the prisoners in captivity, it presents a vivid, sensitive, sometimes excruciating, account of how men sought to cope with the physical and psychological torment of imprisonment under

wretched and shameful conditions. It includes insightful analyses of the circumstances and conditions of captivity and its varying effects on the prisoners, the strategies and tactics of captors and captives, the differences between captivity in North and South Vietnam and between Laos and Vietnam, and analysis of the quality of the source materials for this and other works on the subject. *A History of Natural Philosophy* Cambridge University Press This volume, dedicated to Cilliers Breytenbach on the occasion of his 65th birthday, presents studies on salvation

Natural philosophy encompassed all natural phenomena of the physical world. It sought to discover the physical causes of all natural

effects and was little concerned with mathematics. By contrast, the exact mathematical sciences were narrowly confined to various computations that did not involve physical causes, functioning totally independently of natural philosophy. Although this began slowly to change in the late Middle Ages, a much more thoroughgoing union of natural philosophy and mathematics occurred in the seventeenth century and thereby made the Scientific Revolution possible. The title of Isaac Newton's great work, *The Mathematical Principles of Natural*

Philosophy, perfectly reflects the new relationship. Natural philosophy became the 'Great Mother of the Sciences', which by the nineteenth century had nourished the manifold chemical, physical, and biological sciences to maturity, thus enabling them to leave the 'Great Mother' and emerge as the multiplicity of independent sciences we know today.

founded upon the notion that while solid historical information about Jesus is quite limited, people of different faiths can nevertheless arrive at a consensus on fundamental historical facts of his life. In this eagerly anticipated fourth volume in the series, Meier approaches a fresh topic—the teachings of the historical Jesus concerning Mosaic Law and morality—with the same rigor, thoroughness, accuracy, and insightfulness on display in his earlier works.

The Oxford handbook of cognitive literary studies' applies developments in cognitive science to a wide range of literary texts that span multiple historical periods and numerous national literary traditions. The volume is divided into five parts: (1) Narrative, History, Imagination; (2) Emotions and Empathy; (3) The New Unconscious; (4) Empirical and Qualitative Studies of Literature; and (5) Cognitive Theory and Literary Experience. Most notably, the volume features case studies representing not just North American and British literary traditions, but also Argentinian (Jorge Luis Borges,

Julio Cortazar), Chinese (Cao Xueqin), Colombian (Garcia Marquez), Dominican (Junot Diaz), German (Theodore Fontane), French (Marcel Proust, Gustave Flaubert), Indian (Mirabai, Rabindranath Tagore, Kamala Markandaya, Mani Ratnam, Tito Mukhopadhyay), Mexican (Fernando del Paso), Polish (Krystof Kieslowski), Puerto Rican (Giannina Braschi), Russian (Lev Tolstoi), South African (J.M. Coetzee), and Spanish (Leopoldo Alas). Moreover, the volume will cover a variety of periods (e.g., 0. A Marginal Jew: Rethinking the Historical Jesus, Volume IV Yale University Press E. H. History of the World, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages.

Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the Little History brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the

book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a

sumptuous gift book and an enhanced edition of a timeless account of human history.

Essays on Old Testament

Theology in Honor of Patrick D. Miller BRILL

This collection of essays reflects the wide range of David Pingree's expertise in the scientific texts (above all, concerning astronomy and astrology) of Ancient Mesopotamia, Greece, India, Persia, and the medieval Arabic, Hebrew and Latin traditions.

Both theoretical aspects and the

practical applications of the exact sciences-in time keeping, prediction of the future, and the operation of magic-are dealt with. The book includes several critical editions and translations of hitherto unknown or understudied texts, and a particular emphasis is on the diffusion of scientific learning from one culture to another, and through time. Above all, the essays show the variety and sophistication of the exact sciences in non-Western societies in pre-modern times.

challenge and inspire you. Ideal for personal devotions, Bible studies, and lesson and sermon preparations, The New Matthew Henry Commentary will enable you to rediscover this classic work—or discover it for the first time. Forever fresh and never failing to render new pearls of wisdom, this beloved text is one that you will reach for often to obtain deeper understanding of and appreciation for the Scriptures. General History of the Things of New Spain BRILL The Evolution of Radionanotargeting towards Clinical Precision Oncology is

a remarkable book honoring Professor Kalevi Kairemo, who is known among academic and medical circles as a pioneer in novel radiolabeled therapeutics. This festschrift provides an overview of key advances in the field of radionanotargeting, and the directions for future development in patient care. Prof Kairemo ' s research is based on multiomics, which involves multiple elements: genomics, transcriptomics, proteomics, metabolomics, microbiomics, epigenomics, exposome, imaging, and precision medicine, which is reflected by the unique

collection of articles presented. The articles start from the angle of radionanotargeting and theragnostics leading to imaging and therapy, which includes sections for thyroid cancer, head and neck cancer, genitourinary cancers and neuroendocrine neoplasms. Theragnostics, nanoparticles and precision oncology have also been covered in their own segments, while also giving a glimpse of research in metabolic imaging, cardiovascular radionuclide imaging, and bone therapies. The sequence of chapters demonstrates how, through

---

Professor Kairemo ' s efforts, radionanotargeting has evolved to a practice changing therapeutic approach in the clinic, particularly in oncology. Finally, Professor Kairemo ' s own memoir, “ Seven decades in health care ” and memoirs from colleagues including a personal introduction to him with a photographic cavalcade reveals the world of a multitasking person with a multidisciplinary approach to science, that ushered his development of significant expertise across the fields of chemistry, biology, engineering, physics and clinical medicine.

This book is excellent for medical historians, trainees and specialists in clinical and radiological oncology in expanding their understanding of the role of radionuclide imaging over the years, making it an ideal tribute that belongs in the library of anyone involved in the field. From the Ancient World to the Nineteenth Century Zondervan Time has sealed the reputation of Matthew Henry's classic commentary as a rich source of insight into God's word. Four centuries after its first publication, it remains one of

the best-loved, most popular commentaries ever written. However, while its wisdom is timeless, the English language has changed much through the years. Words that meant one thing in Matthew Henry's day have taken on different meanings today. In addition, Henry's often wordy reflections are generations removed from the crisp style that communicates most effectively to contemporary readers. The Zondervan NIV Matthew Henry Commentary is a masterful response to these concerns. It delivers the heart and soul of Henry's

incomparable writings in a style that is easy to read and understand. -Dr. Leslie Church's meticulous abridgment retains the essential content of the original work. - Easily misunderstood words have been replaced with modern ones while keeping Henry's style. - Use of the New International Version (NIV) instead of the King James Version makes this edition fully compatible with today's most widely used Bible translation. History of the Counts of Guines and Lords of Ardres, a work made famous by Georges Duby, now appears in an expert translation by Leah Shopkow. Consisting of 154 surviving chapters, Lambert's chronicle is just one of many local genealogies produced in Flanders during the high Middle Ages. It is extraordinarily rich and idiosyncratic, however, in its treatment of two competing families, longtime rivals until they were joined by marriage in the mid-twelfth century. In

the first 96 chapters, Lambert, events from different perspectives, The History of priest of the church of Ardres, traces the lineage of the Counts of Guines and the counts of Guines from the Lords of Ardres is a seventh century to his present. Suddenly, narrative control seems to be wrested away by the garrulous Walter LeClud, illegitimate son of Baldwin of Ardres, who tells the history of the other family for the next 50 chapters. At that point, Lambert's voice is finally restored, with an account of the now combined holdings of Guines and Ardres. With two storytellers recounting some of the same

A Prophet with Honor  
Zondervan

This volume launches the translation of a work that describes the development of Chinese political thought from the time of Confucius in the late Chou era into the twentieth century. The author systematically treats leading thinkers, schools,

and movements, displaying a consummate mastery of traditional Chinese learning, and of Western analytical and comparative methods.

This first complete translation includes prefatory remarks by Kung-chuan Hsiao and notes prepared by the translator to assist the Western reader. Originally published in 1979. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of

Volume 43(1) AuthorHouse  
A Prophet with Honor is the biography Billy Graham himself invited and appreciated for its sympathetic but frank approach. Carefully documented, eminently fair, and gracefully written, it raises and answers key questions about Graham's character, contributions, and influence on the world religious scene. In this engaging and comprehensive book, William Martin gives readers a better understanding of the most successful evangelist in modern history, and the movement he led for over fifty years. A Prophet with Honor makes a vital contribution to the Billy Graham legacy and allows us to understand why his words, actions, and personality endeared him to popes and preachers, kings and presidents, and millions of Christians in virtually every nation and culture around the world. Martin draws on extensive conversations with Graham himself nearly two hundred interviews previously untouched resources, including documents from six presidential libraries and the Billy Graham Evangelistic Association archives personal observation of Graham's crusades and conferences in the United States and Europe decades of research on evangelical Christianity Martin pays particular attention to Graham's controversial relationships with Presidents Lyndon Johnson and Richard Nixon. He also describes how Graham's lifelong
