Create your own quick and easy daily routine Declutter and organise your home without a fuss Create more time for loved ones Soothe your soul with a tidy and calming environment Never spend a weekend on chores again

Institutional Buying Guide CRC Press

What Men Live By, and Other Tales Leo Tolstoy - "What Men Live By and Other Tales" compiles tales that handle intricate philosophical issues in a simple

and engaging way to incite the mind. In *What Men Live By* you'll encounter a kind and humble shoemaker, Simon, who, one day, goes out to buy sheepskins to sew a winter coat for his wife and himself to share. Unable to collect the full amount, he only receives twenty Kopeks to buy the skins. Simon is disheartened and spends the twenty Kopeks on Vodka before heading back home... This story, along with other subtle, beautiful, and timeless tales, will immerse you in the world of Russia's most regarded mind. The book comes with three other tales telling of wisdom, acceptance, kindness, and forgiveness. *Three Questions* follows the story of a king who wants to know the

answer to the three most important questions in life to seek enlightenment. *The Coffee-House of Surat*, tells about a coffee shop in the Indian town of Surat that has many travelers and foreigners meet from all over the globe to chat. An educated Persian theologian pays a visit to the coffee shop one day. *How Much Land Does a Man Need?* recounts the tale of Pahom, a peasant, who claims that he would not fear the Devil if he had enough land. When the Devil overhears this, he decides to put him to the test. Immerse in to examine the human condition described by one of the world's greatest pens.

How To Win Friends And Influence

House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor (performed mostly by women). Mechanical carpet sweepers were replaced by manual suction cleaners, which in turn were replaced by electric vacuum cleaners in the early 20th century. Innovative inventors, who improved vacuum cleaners as electricity became commonly available, made these advances possible. Many early manufacturers failed, but some, such as Bissell, Hoover, Eureka and others, became household names as they competed for global dominance with improved features, performance and appearance. This book describes the fascinating people who made this possible, as well as the economic, cultural and

technological contexts of their times. From obscure beginnings 200 years ago, vacuum cleaners have become an integral part of modern household culture.

Earth Day Simon and Schuster
LIFE Magazine is the treasured photographic magazine that chronicled the 20th Century. It now lives on at LIFE.com, the largest, most amazing collection of professional photography on the internet. Users can browse, search and view photos of today ' s people and events. They have free access to share, print and post images for personal use.

Simply Clean Rodale
Finally back in print, with a new Preface by the author, this lively, authoritative, and pathbreaking study considers the history of material advances and domestic service, the

"women's separate sphere," and the respective influences of advertising, home economics, and women's entry into the workforce. Never Done begins by describing the household chores of nineteenth-century America: cooking at fireplaces and on cast-iron stoves, laundry done with boilers and flatirons, endless water-hauling and fire-tending, and so on. Strasser goes on to explain and explore how industrialization transformed the nature of women's work. Easing some tasks and eliminating others, new commercial processes inexorably altered women's daily lives and relationships—with each other and with those they served.

The 15-Minute Clean Kensington Publishing Corp.

Earth Day celebrates our beautiful planet and calls us to act on its behalf. Some people spend the day planting flowers or trees. Others organize neighborhood clean-ups, go on nature walks, or make recycled crafts. Readers will discover how a shared holiday can have multiple traditions and be celebrated in all sorts of ways.

Country Home Gallery Books

Intraspecific communication involves the activation of chemoreceptors and subsequent activation of different central areas that coordinate the responses of the entire organism—ranging from behavioral modification to modulation of hormones release. Animals emit intraspecific chemical signals, often referred to as

pheromones, to advertise their presence to members of the same species and to regulate interactions aimed at establishing and regulating social and reproductive bonds. In the last two decades, scientists have developed a greater understanding of the neural processing of these chemical signals. *Neurobiology of Chemical Communication* explores the role of the chemical senses in mediating intraspecific communication. Providing an up-to-date outline of the most recent advances in the field, it presents data from laboratory and wild species, ranging from invertebrates to vertebrates, from insects to humans. The book examines the structure, anatomy, electrophysiology, and molecular biology of pheromones. It discusses how chemical signals work on different mammalian and non-mammalian species and includes chapters on insects,

Drosophila, honey bees, amphibians, mice, tigers, and cattle. It also explores the controversial topic of human pheromones. An essential reference for students and researchers in the field of pheromones, this is also an ideal resource for those working on behavioral phenotyping of animal models and persons interested in the biology/ecology of wild and domestic species.

Trichloroethylene,
Tetrachloroethylene and Some Other Chlorinated Agents Welbeck Publishing Group

With a New Chapter and Updated Epilogue on Coronavirus A Financial Times Best Health Book of 2019 and a New York Times Book Review Editors ' Choice "Honigsbaum does a superb job covering a century ' s worth

of pandemics and the fears they invariably unleash." —Howard Markel, MD, PhD, director of the Center for the History of Medicine, University of Michigan How can we understand the COVID-19 pandemic? Ever since the 1918 Spanish influenza pandemic, scientists have dreamed of preventing such catastrophic outbreaks of infectious disease. Yet despite a century of medical progress, viral and bacterial disasters continue to take us by surprise, inciting panic and dominating news cycles. In *The Pandemic Century*, a lively account of scares both infamous and less known, medical historian Mark Honigsbaum combines reportage with the history of science and medical sociology to

artfully reconstruct epidemiological mysteries and the ecology of infectious diseases. We meet dedicated disease detectives, obstructive or incompetent public health officials, and brilliant scientists often blinded by their own knowledge of bacteria and viruses—and see how fear of disease often exacerbates racial, religious, and ethnic tensions. Now updated with a new chapter and epilogue.

The Ladies' Home Journal Simon and Schuster

The MoneySmart Family System will show you how to teach your children to manage money and have a good attitude while they're learning to earn, budget, and spend wisely.

Big Green Purse Pan Macmillan

A young detective 's first case in Tennessee puts her on the path of a gruesome serial killer in the New York Times bestselling author 's romantic thriller. One by one, they will die. He has waited patiently, envisioning their final moments. Their tortured screams, their pleas

for mercy—all will be in vain as he executes his sadistic plan. Homicide detective Julia Cass has witnessed plenty of crime scenes. But the murder of a Chattanooga judge is shocking in its brutality. Teamed with FBI agent Will Brannock, Julia delves into an investigation that soon unearths more bodies—all mutilated in the same way, all left with a gruesome souvenir of a killer's ruthless rage . . . The only way to stop the slaughter is to predict the next victim. But when you're dealing with vengeance at its most ruthless, one wrong move can make you a target . . . and the next word you utter could be your last . .

Booklist • Globe and Mail Her name

was Henrietta Lacks, but scientists

know her as HeLa. She was a poor

Southern tobacco farmer who

worked the same land as her slave

ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “ immortal ” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb ’ s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta ’ s family

did not learn of her “ immortality ” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are

made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta ' s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn ' t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.
