We have enough money you this proper as capably as easy pretentiousness to acquire those all. We manage to pay for Hoover Carpet Cleaning Solution and numerous book collections from fictions to scientific research in any way. in the midst of them is this Hoover Carpet Cleaning Solution that can be your partner.

Country Home McFarland
Finally back in print, with a new Preface by the author, this lively, authoritative, and pathbreaking study considers

the history of material advances and domestic service, the "women's separate sphere," and the respective influences of advertising, home economics, and women's entry into the workforce. Never Done begins by describing the household chores of nineteenth-century America: cooking at fireplaces and on cast-iron stoves, laundry done with boilers and flatirons, endless water-hauling and fire-tending, and so on.

Strasser goes on to explain and explore how industrialization transformed the nature of women's work. Easing some tasks and eliminating others, new commercial processes inexorably altered women's daily lives and relationships—with each other and with those they served.

Ad \$ Summary Penguin

What if you could always have a sparkling clean and organized home by just spending 15 minutes per day on your housework? The 15-Minute Clean will teach you how to do just that. Cleaning has never been easier than with TV's Queen of Clean, Lynsey Crombie, and her guide to your new daily cleaning routine. No more mess, no more hours of chores on the weekend - just one 15-minute session per day that you will

power through in a flash - leaving you to enjoy the rest of your day. Once you adopt your daily 15-Minute Clean, you'll never look back. Create your own quick and easy daily routine

Declutter and organise your home without a fuss Create more time for loved ones Soothe your soul with a tidy and calming environment Never spend a weekend on chores again

Reviews • Booklist • Globe and Mail Her name was
 Henrietta Lacks, but scientists know her as HeLa.
 She was a poor Southern tobacco farmer who worked
 the same land as her slave ancestors, yet her cells—taken
 without her knowledge—became one of
 the most important tools in medicine: The first
 “immortal” human cells grown in culture, which are
 still alive today, though she has been dead for more than
 sixty years. HeLa cells were vital for developing the polio
 vaccine; uncovered secrets of cancer, viruses, and the
 atom bomb’s effects; helped lead to important advances
 like in vitro fertilization, cloning, and gene mapping;
 and have been bought and sold by the billions. Yet
 Henrietta Lacks remains virtually unknown, buried in

an unmarked grave. Henrietta's family did not learn of her "immortality" until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta's daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn't her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

Earth Day Crown
A young detective's first case in Tennessee puts her on the path of a gruesome serial killer in the New York Times bestselling author's romantic thriller. One by one, they will die. He has waited patiently,

envisioning their final moments. Their tortured screams, their pleas for mercy—all will be in vain as he executes his sadistic plan. Homicide detective Julia Cass has witnessed plenty of crime scenes. But the murder of a Chattanooga judge is shocking in its brutality. Teamed with FBI agent Will Brannock, Julia delves into an investigation that soon unearths more bodies—all mutilated in the same way, all left with a gruesome souvenir of a killer's ruthless rage . . . The only way to stop the slaughter is to predict the next victim. But when you're dealing with vengeance at its most ruthless, one wrong move can make you a target . . . and the next word you utter could be your last . . .

She shares her system to turn cleaning from a chore into an effortless habit, and also shares recipes for organic, environmentally conscious cleaning supplies.

Neurobiology of Chemical Communication W. W.

Norton & Company

The immensely popular blogger behind Little House Living provides a timeless and “heartwarming guide to modern homesteading” (BookPage) that will inspire you to live your life simply and frugally—perfect for fans of *The Pioneer Woman* and *The Hands-On Home*. Shortly after getting married, Merissa Alink

and her husband found themselves with nothing in their pantry but a package of spaghetti and some breadcrumbs. Their life had seemingly hit rock bottom, and it was only after a touching act of charity that they were able to get back on their feet again. Inspired by this gesture of kindness as well as the beloved *Little House on the Prairie* books, Merissa was determined to live an entirely made-from-scratch life, and as a result, she rescued her household budget—saving thousands of dollars a year. Now, she reveals the powerful and moving lessons she’s learned after years of homesteading, homemaking, and cooking from scratch. Filled with charm, practical advice, and gorgeous full-color photographs, Merissa shares everything from tips on budgeting to natural, easy-to-make recipes for taco seasoning mix, sunscreen, lemon poppy hand scrub, furniture polish,

and much more. Inviting and charming, *Little House Living* is the epitome of heartland warmth and prairie inspiration. Popular Mechanics Macmillan House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor (performed mostly by women). Mechanical carpet sweepers were replaced by manual suction cleaners, which in turn were replaced by electric vacuum cleaners in the early 20th century. Innovative inventors, who improved vacuum cleaners as electricity became commonly available, made these advances possible. Many early manufacturers failed, but some, such as Bissell, Hoover, Eureka and others, became household names as they competed for global dominance with improved features, performance and appearance. This book describes the fascinating people who made this possible, as well as the economic, cultural and technological contexts of their times. From obscure beginnings

200 years ago, vacuum cleaners have become an integral part of modern household culture.

The 15-Minute Clean Welbeck Publishing Group

Provides simple recipes for non-toxic cleaners made from inexpensive, common ingredients, and offers tips on how to clean a home safely

Clean & Green DigiCat

Intraspecific communication involves the activation of chemoreceptors and subsequent activation of different central areas that coordinate the responses of the entire organism—ranging from behavioral modification to modulation of hormones release.

Animals emit intraspecific chemical signals, often referred to as pheromones, to advertise their presence to members of the same species and to regulate interactions aimed at establishing and regulating social and reproductive bonds. In the last two decades, scientists have developed a greater understanding of the neural processing of these chemical signals. *Neurobiology of Chemical Communication* explores the role of the chemical senses in

mediating intraspecific communication. Providing an up-to-date outline of the most recent advances in the field, it presents data from laboratory and wild species, ranging from invertebrates to vertebrates, from insects to humans. The book examines the structure, anatomy, electrophysiology, and molecular biology of pheromones. It discusses how chemical signals work on different mammalian and non-mammalian species and includes chapters on insects, *Drosophila*, honey bees, amphibians, mice, tigers, and cattle. It also explores the controversial topic of human pheromones. An essential reference for students and researchers in the field of pheromones, this is also an ideal resource for those working on behavioral phenotyping of animal models and persons interested in the biology/ecology of wild and domestic species.

LIFE CRC Press

Read Diane McEachern's posts on the Penguin Blog. Protecting our environment is one of the biggest issues facing our planet today. But

how do we solve a problem that can seem overwhelming-even hopeless? As Diane MacEachern argues in *Big Green Purse*, the best way to fight the industries that pollute the planet, thereby changing the marketplace forever, is to mobilize the most powerful consumer force in the world-women. MacEachern's message is simple but revolutionary. If women harness the "power of their purse" and intentionally shift their spending money to commodities that have the greatest environmental benefit, they can create a cleaner, greener world. Spirited and informative, this book: - targets twenty commodities-cars, cosmetics, coffee, food, paper products, appliances, cleansers, and more-where women's dollars can make a dramatic difference; - provides easy-to-follow guidelines and lists so women can choose the greenest option regardless of what they're buying, along with recommended companies they should support; - encourages women to spend wisely by explaining what's worth the premium price some green products cost, what's not, and

when they shouldn't spend money at all; and - differentiates between products that are actually "green" and those that are simply marketed as "ecofriendly." Whether readers want to start with small changes or are ready to devote the majority of their budget to green products, MacEachern offers concrete and immediate ways that women can take action and make a difference. Empowering and enlightening, Big Green Purse will become the "green shopping bible" for women everywhere who are asking, "What can I do?"

What Men Live By, and
Other Tales Houghton

The MoneySmart Family
System will show you how to
teach your children to
manage money and have a
good attitude while they're
learning to earn, budget, and
spend wisely.

Big Green Purse Pebble

Imagine if your best friend
gave you vital information
that could protect you and

your family, and save you
money, and help the planet.
Imagine if you were given
clear, simple choices, small
changes that could have a big
impact on your life. And you
could still wear leather shoes
and deodorant. You'd listen,
right? Well, think of Today
show contributor Sloan
Barnett as that friend. A
mother of three, a dedicated
consumer advocate, Sloan
gives us a fast, simple, down-
toearth primer on the ways
our homes are making us sick,
and what we can all do to
transform them into the safe
sanctuaries we want and need
them to be. Sloan exposes the
toxic truth behind the
household products we use
every day -- from laundry
detergent to toothpaste to
lipstick. She explains how
these and other seemingly
benign stuff can harm us and
our children. She offers an

array of alternatives, and
inspires us to see that we're
never helpless: Every day, we
have the power to make
better, smarter, safer choices.
Packed with common sense
and sass, product picks and
practical tips, *Green Goes
With Everything* is for
everyone who wants to live a
healthier life.
