What Men Live By, and Other Tales Leo Tolstoy - "What Men Live By and Other Tales" compiles tales that handle intricate philosophical issues in a simple and engaging way to incite the mind. In What Men Live By you'll encounter a kind and humble shoemaker, Simon, who, one day, goes out to buy sheep-skins to sew a winter coat for his wife and himself to share. Unable to collect the full amount, he only receives twenty Kopeks to buy the skins. Simon is disheartened and spends the twenty Kopeks on Vodka before heading back home... This story, along with other subtle, beautiful, and timeless tales, will immerse you in the world of Russia's most regarded mind. The book comes with three other tales telling of wisdom, acceptance, kindness, and forgiveness. Three Questions follows the story of a king who wants to know the answer to the three most important questions in life to seek enlightenment. The Coffee-House of Surat, tells about a coffee shop in the Indian town of Surat that has many travelers and foreigners meet from all over the globe to chat. An educated Persian theologian pays a visit to the coffee shop one day. How Much Land Does a Man Need? recounts the tale of Pahom, a peasant, who claims that he would not fear the Devil if he had enough land. When the Devil overhears this, he decides to put him to the test. Immerse in to examine the human condition described by one of the world's greatest pens.

Reviews of Environmental Contamination and Toxicology 201 Random House Books for Young Readers

Imagine if your best friend gave you vital information that could protect you and your family, and save you money, and help the planet. Imagine if you were given clear, simple choices, small changes that could have a big impact on your life. And you could still wear leather shoes and deodorant. You'd listen, right? Well, think of Today show contributor Sloan Barnett as that friend. A mother of three, a dedicated consumer advocate, Sloan gives us a fast, simple, down-to-earth primer on the ways our homes are making us sick, and what we can all do to transform them into the safe sanctuaries we want and need them to be. Sloan exposes the toxic truth behind the household products we use every day -- from laundry detergent to toothpaste to lipstick. She explains how these and other seemingly benign stuff can harm us and our children. She offers an array of alternatives, and inspires us to see that we're never helpless: Every day, we have the power to make better, smarter, safer choices. Packed with common sense and sass, product picks and practical tips, Green Goes With Everything is for everyone who wants to live a healthier life.

#1 NEW YORK TIMES BESTSELLER • "The story of modern medicine and bioethics—and, indeed, race relations—is refracted beautifully, and movingly."—Entertainment Weekly NOW A MAJOR MOTION PICTURE FROM HBO® STARRING OPRAH WINFREY AND ROSE BYRNE • ONE OF THE "MOST INFLUENTIAL" (CNN), "DEFINING" (LITHUB), AND "BEST" (THE PHILADELPHIA INQUIRER) BOOKS OF THE DECADE • ONE OF ESSENCE'S 50 MOST IMPACTFUL BLACK BOOKS OF THE PAST 50 YEARS • WINNER OF THE CHICAGO TRIBUNE HEARTLAND PRIZE FOR NONFICTION NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • Entertainment Weekly • O: The Oprah Magazine • NPR • Financial Times • New York • Independent (U.K.) • Times (U.K.) • Publishers Weekly • Library Journal • Kirkus Reviews • Booklist • Globe and Mail Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first "immortal" human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb's effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta's family did not learn of her "immortality" until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta's daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn't her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

[Never Done](#) Rodale

This publication provides an assessment of the carcinogenic hazards associated with exposure to seven chlorinated solvents, including trichloroethylene, tetrachloroethylene, and their metabolites (dichloroacetic acid, trichloroacetic acid, and chloral hydrate). All these agents were previously assessed by IARC Working Groups more than 10 years ago, and new epidemiological and mechanistic evidence has been considered in this reevaluation. Trichloroethylene has been used in several industries, such as manufacture and repair of aircraft and automobiles, and in screw-cutting, while tetrachloroethylene is widely used in dry-cleaning and as a feedstock for the production of chlorinated chemicals.

[The Immortal Life of Henrietta Lacks](#) Little House Living

A young detective's first case in Tennessee puts her on the path of a gruesome serial killer in the New York Times bestselling author's romantic thriller. One by one, they will die. He has waited patiently, envisioning their final moments. Their tortured screams, their pleas for mercy—all will be in vain as he executes his sadistic plan. Homicide detective Julia Cass has witnessed plenty of crime scenes. But the murder of a Chattanooga judge is shocking in its brutality. Teamed with FBI agent Will Brannock, Julia delves into an investigation that soon unearths more bodies—all mutilated in the same way, all left with a gruesome souvenir of a killer's ruthless rage. . . . The only way to stop the slaughter is to predict the next victim. But when you're dealing with vengeance at its most ruthless, one wrong move can make you a target. . . . and the next word you utter could be your last. . . .

[The Dry Goods Reporter](#) W. W. Norton & Company

Intraspecific communication involves the activation of chemoreceptors and subsequent activation of different central areas that coordinate the responses of the entire organism—ranging from behavioral modification to modulation of hormones release. Animals emit intraspecific chemical signals, often referred to as pheromones, to advertise their presence to members of the same species and to regulate interactions aimed at establishing and

regulating social and reproductive bonds. In the last two decades, scientists have developed a greater understanding of the neural processing of these chemical signals. Neurobiology of Chemical Communication explores the role of the chemical senses in mediating intraspecific communication. Providing an up-to-date outline of the most recent advances in the field, it presents data from laboratory and wild species, ranging from invertebrates to vertebrates, from insects to humans. The book examines the structure, anatomy, electrophysiology, and molecular biology of pheromones. It discusses how chemical signals work on different mammalian and non-mammalian species and includes chapters on insects, Drosophila, honey bees, amphibians, mice, tigers, and cattle. It also explores the controversial topic of human pheromones. An essential reference for students and researchers in the field of pheromones, this is also an ideal resource for those working on behavioral phenotyping of animal models and persons interested in the biology/ecology of wild and domestic species.

Don't Say a Word Simon and Schuster

The immensely popular blogger behind Little House Living provides a timeless and "heartwarming guide to modern homesteading" (BookPage) that will inspire you to live your life simply and frugally-perfect for fans of The Pioneer Woman and The Hands-On Home. Shortly after getting married, Merissa Alink and her husband found themselves with nothing in their pantry but a package of spaghetti and some breadcrumbs. Their life had seemingly hit rock bottom, and it was only after a touching act of charity that they were able to get back on their feet again. Inspired by this gesture of kindness as well as the beloved Little House on the Prairie books, Merissa was determined to live an entirely made-from-scratch life, and as a result, she rescued her household budget-saving thousands of dollars a year. Now, she reveals the powerful and moving lessons she's learned after years of homesteading, homemaking, and cooking from

scratch. Filled with charm, practical advice, and gorgeous full-color photographs, Merissa shares everything from tips on budgeting to natural, easy-to-make recipes for taco seasoning mix, sunscreen, lemon poppy hand scrub, furniture polish, and much more. Inviting and charming, Little House Living is the epitome of heartland warmth and prairie inspiration.

Reviews of Environmental Contamination and Toxicology attempts to provide concise, critical reviews of timely advances, philosophy and significant areas of accomplished or needed endeavor in the total field of xenobiotics, in any segment of the environment, as well as toxicological implications.

Neurobiology of Chemical Communication Pan Macmillan

Finally back in print, with a new Preface by the author, this lively, authoritative, and pathbreaking study considers the history of material advances and domestic service, the "women's separate sphere," and the respective influences of advertising, home economics, and women's entry into the workforce. Never Done begins by describing the household chores of nineteenth-century America: cooking at fireplaces and on cast-iron stoves, laundry done with boilers and flatirons, endless water-hauling and fire-tending, and so on. Strasser goes on to explain and explore how industrialization transformed the nature of women's work. Easing some tasks and eliminating others, new commercial processes inexorably altered women's daily lives and relationships-with each other and with those they served.

Good Housekeeping Welbeck Publishing Group

Read Diane McEachern's posts on the Penguin Blog. Protecting our environment is one of the biggest issues facing our planet today. But how do we solve a problem that can seem overwhelming-even hopeless? As Diane MacEachern argues in Big Green Purse, the best way to fight the industries that pollute the planet, thereby changing the marketplace forever, is to mobilize the most powerful consumer force in the world-women. MacEachern's message is simple but revolutionary. If women harness the "power of their purse" and intentionally shift their spending money to commodities that have the greatest environmental benefit, they can create a cleaner, greener world. Spirited and informative, this book: - targets twenty commodities-cars, cosmetics, coffee, food, paper products, appliances, cleansers, and more-where women's dollars can make a dramatic difference; - provides easy-to-follow guidelines and lists so women can choose the greenest option regardless of what they're buying, along with recommended companies they should support; - encourages women to spend wisely by explaining what's worth the premium price some green products cost, what's not, and when they shouldn't spend money at all; and - differentiates between products that are actually "green" and those that are simply marketed as "ecofriendly." Whether readers want to start with small changes or are ready to devote the majority of their budget to green products, MacEachern offers concrete and immediate ways that women can take action and make a difference. Empowering and enlightening, Big Green Purse will become the "green shopping bible" for women everywhere who are asking, "What can I do?"
