THE SUNDAY TIMES BESTSELLER The Organised Mum Method is THE housekeeping bible that will completely revolutionise your home. Say goodbye to mess, clutter and weekends spent tidying and cleaning! Gemma Bray (a.k.a The Organised Mum) is a firm believer that there is more to life than housework, and over the last decade she has perfected The Organised Mum Method (TOMM). * The Organised Mum Method is a structured, manageable and ultra-efficient cleaning routine that ensures all areas of the home are taken care of. It's easy to follow, effective and ensures that everything gets done in just 30 minutes a day, Monday to Friday ... and you get weekends off! Perfect for existing fans of TOMM or anyone looking for ways to fit cleaning around a busy lifestyle, The Organised Mum Method includes life-changing tips, tricks, cleaning schedules, shopping lists, meal plans and quick recipes that will help you get your housework done fast. *Don't worry dads -- it works for you too.

Reinventing Fire Macmillan

Intraspecific communication involves the activation of chemoreceptors and subsequent activation of different central areas that coordinate the responses of the entire organism—ranging from behavioral modification to modulation of hormones release. Animals emit intraspecific chemical signals, often referred to as pheromones, to advertise their presence to members of the same species and to regulate interactions aimed at establishing and regulating social and reproductive bonds. In the last two decades, scientists have developed a greater understanding of the neural processing of these chemical signals. Neurobiology of Chemical Communication explores the role of the chemical senses in mediating intraspecific communication. Providing an up-to-date outline of the most recent advances in the field, it presents data from laboratory and wild species, ranging from invertebrates to vertebrates, from insects to humans. The book examines the structure, anatomy, electrophysiology, and molecular biology of pheromones. It discusses how chemical signals work on different mammalian and non-mammalian species and includes chapters on insects, Drosophila, honey bees, amphibians, mice, tigers, and cattle. It also explores the controversial topic of human pheromones. An essential reference for students and researchers in the field of pheromones, this is also an ideal resource for those working on behavioral phenotyping of animal models and persons interested in the biology/ecology of wild and domestic species.

A Bright Future CRC Press

Do you feel overwhelmed by your lack of organization in your home? Does it seem like your space is slowly turning into a disaster? Do you feel like you are being overwhelmed by the mess and dust that seem to accumulate every time you turn around? If so, you are not alone; thousands of people share your frustration. In this book I will show you how you can start organizing your home in the fastest way possible. I will be showing you three different methods for implementing a home

organization checklist. After reading this article, you should be able to easily implement one or more of these methods into your daily life. Hopefully you will gain some new confidence that will help you become more organized and improve the way your home looks. The first method of organization involves taking out everything you own and categorizing them. Next, you should use baskets and other containers to store everything in. Baskets are an excellent way to store things because they allow you to easily see what you have. You will always wear a clear container such as a bin, drawers, or a basket because you never want to guess at what you have on hand.

The 15-Minute Clean Simon and Schuster

Advertising expenditure data across multiple forms of media, including: consumer magazines, Sunday magazines, newspapers, outdoor, network television, spot television, syndicated television, cable television, network radio, and national spot radio. Lists brands alphabetically and shows total expenditures, media used, parent company and PIB classification for each brand. Also included in this report are industry class totals and rankings of the top 100 companies in each of the media.

New York Review of the Telegraph and Telephone and Electrical Journal Hoovers Incorporated

In this amazing and at times ribald story, Laton McCartney tells how Big Oil handpicked Warren G. Harding, an obscure Ohio senator, to serve as our twenty-third president. Harding and his "oil cabinet" made it possible for cronies to secure vast fuel reserves that had been set aside for use by the U.S. Navy. In exchange, the oilmen paid off senior government officials, bribed newspaper publishers, and covered the GOP campaign debt. When news of the scandal finally emerged, the consequences were disastrous. Drawing on contemporary records newly made available to McCartney, The Teapot Dome Scandal reveals a shocking, revelatory picture of just how far-reaching the affair was, how high the stakes, and how powerful the conspirators—all told in a dazzling narrative style.

Ad \$ Summary Harper Collins

Tackles resource scarcity and sustainability and describes how everyday objects from chairs to cars and factories are being redesigned to sustain and promote life.

LIFE FASTLANE LLC

Hoover's Handbook of American Business 2007 Vintage

Earth Day celebrates our beautiful planet and calls us to act on its behalf. Some people spend the day planting flowers or trees. Others organize neighborhood clean-ups, go on nature walks, or make recycled crafts. Readers will discover how a shared holiday can have multiple traditions and be celebrated in all sorts of ways.

Little House Living CRC Press

The first book to offer a proven, fast, inexpensive, and practical way to cut greenhouse gas emissions and prevent catastrophic climate change. As climate change quickly approaches a series of turning points that guarantee disastrous outcomes, a solution is hiding in plain sight. Several countries have already replaced fossil fuels with low-carbon energy sources, and done so rapidly, in one to two decades. By following their methods, we could decarbonize the global economy by midcentury, replacing fossil fuels even while world energy use continues to rise. But so far we have lacked the courage to really try. In this clear-sighted and compelling book, Joshua Goldstein and Staffan Qvist explain how clean energy quickly replaced fossil fuels in such places as Sweden, France, South Korea, and Ontario. Their people enjoyed prosperity and growing energy use in harmony with the natural environment. They didn't do this through personal sacrifice, nor through 100 percent renewables, but by using them in combination with an energy source the Swedes call k Å ¢ kraft, hundreds of times safer and cleaner than coal. Clearly written and beautifully illustrated, yet footnoted with extensive technical references, Goldstein and Qvist's book will provide a new touchstone in discussions of climate change. It could spark a shift in

world energy policy that, in the words of Steven Pinker's foreword, literally saves the world.

Read Diane McEachern's posts on the Penguin Blog. Protecting our environment is one of the biggest issues facing our planet today. But how do we solve a problem that can seem overwhelming—even hopeless? As Diane McEachern argues in Big Green Purse, the best way to fight the industries that pollute the planet, thereby changing the marketplace forever, is to mobilize the most powerful consumer force in the world—women. MacEachern's message is simple but revolutionary. If women harness the "power of their purse" and intentionally shift their spending money to commodities that have the greatest environmental benefit, they can create a cleaner, greener world. Spirited and informative, this book: - targets twenty commodities—cars, cosmetics, coffee, food, paper products, appliances, cleansers, and more—where women's dollars can make a dramatic difference; - provides easy-to-follow guidelines and lists so women can choose the greenest option regardless of what they're buying, along with recommended companies they should support; - encourages women to spend wisely by explaining what's worth the premium price some green products cost, what's not, and when they shouldn't spend money at all; and - differentiates between products that are actually "green" and those that are simply marketed as "ecofriendly." Whether readers want to start with small changes or are ready to devote the majority of their budget to green products, MacEachern offers concrete and immediate ways that women can take action and make a difference. Empowering and enlightening, Big Green Purse will become the "green shopping bible" for women everywhere who are asking, "What can I do?"

The immensely popular blogger behind Little House Living provides a timeless and "heartwarming guide to modern homesteading" (BookPage) that will inspire you to live your life simply and frugally—perfect for fans of The Pioneer Woman and The Hands-On Home. Shortly after getting married, Merissa Alink and her husband found themselves with nothing in their pantry but a package of spaghetti and some breadcrumbs. Their life had seemingly hit rock bottom, and it was only after a touching act of charity that they were able to get back on their feet again. Inspired by this gesture of kindness as well as the beloved Little House on the Prairie books, Merissa was determined to live an entirely made-from-scratch life, and as a result, she rescued her household budget—saving thousands of dollars a year. Now, she reveals the powerful and moving lessons she's learned after years of homesteading, homemaking, and cooking from scratch. Filled with charm, practical advice, and gorgeous full-color photographs, Merissa shares everything from tips on budgeting to natural, easy-to-make recipes for taco seasoning mix, sunscreen, lemon poppy hand scrub, furniture polish, and much more. Inviting and charming, Little House Living is the epitome of heartland warmth and prairie inspiration.

The Vacuum Cleaner Random House Trade Paperbacks

"An exemplary biography—exhaustively researched, fair-minded and easy to read. It can nestle on the same shelf as David McCullough's Truman, a high compliment indeed." —The Wall Street Journal The definitive biography of Herbert Hoover, one of the most remarkable Americans of the twentieth century—a wholly original account that will forever change the way Americans understand the man, his presidency, his battle against the Great Depression, and their own history. An impoverished orphan who built a fortune. A great humanitarian. A president elected in a landslide and then resoundingly defeated four years later. Arguably the father of both New Deal liberalism and modern conservatism, Herbert Hoover lived one of the most extraordinary American lives of the twentieth century. Yet however astonishing, his accomplishments are often eclipsed by the perception that Hoover was inept and heartless in the face of the Great Depression. Now, Kenneth Whyte vividly recreates Hoover's rich and dramatic life in all its complex glory. He follows Hoover through his Iowa boyhood, his cutthroat business career, his brilliant rescue of millions of lives during World War I and the 1927 Mississippi floods, his misconstrued presidency, his defeat at the hands of a ruthless Franklin Roosevelt, his devastating years in the political wilderness, his return to grace as Truman's emissary to help European refugees after World War II, and his final vindication in the days of Kennedy's "New Frontier." Ultimately, Whyte brings to light Hoover's complexities and contradictions—his modesty and ambition, his ruthlessness and extreme generosity—as well as his profound political legacy. Hoover: An Extraordinary Life in Extraordinary Times is the epic, poignant story of the deprived boy who, through force of will, made himself the most accomplished figure in the land, and who experienced a range of achievements and failures unmatched by any American of his, or perhaps any, era. Here, for the first time, is the definitive biography that fully captures the colossal scale of Hoover's momentous life and volatile times.

PAMPER YOUR WASHABLES: From silk sheets to suede jackets, consult the Queen's sage advice on fabric types - and lift stains from all your belongings with tender loving care!

A Global Warming Primer Pebble

Slang is often seen as a lesser form of language, one that is simply not as meaningful or important as its 'regular' counterpart. Connie Eble refutes this notion as she reveals the sources, poetry, symbolism, and subtlety of informal slang expressions. In *Slang and Sociability*, Eble explores the words and phrases that American college students use casually among themselves. Based on more than 10,000 examples submitted by Eble's students at the University of North Carolina at Chapel Hill over the last twenty years, the book shows that slang is dynamic vocabulary that cannot be dismissed as deviant or marginal. Like more formal words and phrases, slang is created, modified, and transmitted by its users to serve their own purposes. In the case of college students, these purposes include cementing group identity and opposing authority. The book includes a glossary of the more than 1,000 slang words and phrases discussed in the text, as well as a list of the 40 most enduring terms since 1972. Examples from the glossary: group gropes -- encounter groups squirrel kisser -- environmentalist Goth -- student who dresses in black and listens to avant-garde music bad bongos -- situation in which things do not go well triangle -- person who is stupid or not up on the latest za -- pizza smoke -- to perform well dead soldier -- empty beer container toast -- in big trouble, the victim of misfortune parental units -- parents

And a big bonus: Melissa gives guidance on the best non-toxic, eco-conscious cleaning products and offers natural cleaning solution recipes you can make at home using essential oils to soothe and refresh. With Melissa 's simple groundbreaking method you can truly live in a cleaner, more cheerful, and calming home all the time.

Neurobiology of Chemical Communication Chelsea Green Publishing

House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor (performed mostly by women). Mechanical carpet sweepers were replaced by manual suction cleaners, which in turn were replaced by electric vacuum cleaners in the early 20th century. Innovative inventors, who improved vacuum cleaners as electricity became commonly available, made these advances possible. Many early manufacturers failed, but some, such as Bissell, Hoover, Eureka and others, became household names as they competed for global dominance with improved features, performance and appearance. This book describes the fascinating people who made this possible, as well as the economic, cultural and technological contexts of their times. From obscure beginnings 200 years ago, vacuum cleaners have become an integral part of modern household culture.
