Anthropologists have long sought to engage and describe foreign or "alien" societies, yet few have considered the fluid communities centered around a shared belief in alien beings and UFO sightings and their effect on popular and expressive culture. Opening up a new frontier for anthropological study, the contributors to *E.T. Culture* take these communities seriously. They demonstrate that an E.T. orientation toward various forms of visitation—including alien beings, alien technologies, and uncanny visions—engages primary concepts underpinning anthropological research: host and visitor, home and away, subjectivity and objectivity. Taking the point of view of those who commit to sci-fi as sci-fact, contributors to this volume show how discussions and representations of otherworldly beings express concerns about racial and ethnic differences, the anxieties and fascination associated with modern technologies, and alienation from the inner workings of government. Drawing on social science, science studies, linguistics, popular and expressive culture, and social and intellectual history, the writers of *E.T. Culture* unsettle the boundaries of science, magic, and religion as well as those of technological and human agency. They consider the ways that sufferers of "unmarked" diseases such as Chronic Fatigue Syndrome come to feel alien to both the "healthy" world and the medical community incapable of treating them; the development of alien languages like Klingon; attempts to formulate a communications technology—such as that created for the spaceship *Voyager*—that will reach alien beings; the pilgrimage spirit of UFO seekers; the out-of-time experiences of Nobel scientists; the embrace of the alien within Japanese animation and fan culture; and the physical spirituality of the Raëlian religious network. This book covers the technology of inspection of metals, the main emphasis on final part inspection at the manufacturing facility or on receipt at the user's facility. The unique feature of this book is that it provides an intermediate level introduction to the different methods used to inspect metals and finished parts and a more detailed review of the specific inspection methods for important metal product forms.

The book is divided into two parts: Part I gives the basics of the most important methods used for inspection and testing, while Part II covers the types of methods used to inspect different classes of metallic parts. The advantages and limitations of each method are discussed, including when other methods may be warranted. In particular, the chapters on specific product forms (e.g., castings) compare the different inspection methods and why they are used.

In this companion text to *Analog Circuit Design: Art, Science, and Personalities*, seventeen contributors present more tutorial,

historical, and editorial viewpoints on subjects related to analog circuit design. By presenting divergent methods and views of people who have achieved some measure of success in their field, the book encourages readers to develop their own approach to design. In addition, the essays and anecdotes give some constructive guidance in areas not usually covered in engineering courses, such as marketing and career development. *Includes visualizing operation of analog circuits *Describes troubleshooting for optimum circuit performance *Demonstrates how to produce a saleable product The Chambers Dictionary BRILL

This widely acclaimed book, first published in 1974, was a classic from its first day in print. Written in a direct, inviting way by Harry Braverman, whose years as an industrial worker gave him rich personal insight into work, *Labor and Monopoly Capital* overturned the reigning ideologies of academic sociology. This new edition features an introduction by John Bellamy Foster that sets the work in historical and theoretical context, as well as two rare articles by Braverman, "The Degradation of Work in the Twentieth Century" (1975) and "Two Comments" (1976), that add much to our understanding of the book.

Labor and Monopoly Capital Amnesty International British Section Early Buddhist Metaphysics provides a philosophical account of the major doctrinal shift in the history of early Theravada tradition in India: the transition from the earliest stratum of Buddhist thought to the systematic and allegedly scholastic philosophy of the Pali Abhidhamma movement. Entwining comparative philosophy and Buddhism, the author probes the Abhidhamma's metaphysical transition in terms of the Aristotelian tradition and vis-à-vis modern philosophy, exploits Western philosophical literature from Plato to contemporary texts in the fields of philosophy of mind and cultural criticism.

Acronym agglomeration is an affliction of the age, and there are acronym addicts who, in their weakness, find it impossible to resist them. More than once in recent months my peers have cautioned me about my apparent readiness to use not only acronyms, but abbreviations, foreignisms, codes, and other cryptic symbols rather than common, ordinary American words. Many among us, though, either have not received or have chosen to ignore such advice. As a consequence, what we write and speak is full of mystery and confusion. It is then for the reader and listener and for the writer and speaker that Reta C. Moser has compiled this guide. Its effective application to the art of communication is urged. Such use should help avoid many of the misunderstandings involving terminology which occur daily. Although such misunderstandings are certainly crucial in humanistic and social situations, they are often of immediate import and the trigger to disaster in scientific, technical, and political situations. Some 15,000 acronyms and 25,000 definitions are provided (a 50- and 47 -percent increase over the 1964 edition!), with due credit to Miss Moser's diligence in making the compilation and with the acknowledgment that the acronymical phenomenon is very much with us. This edition, like the first, is certain to be of value to writers, librarians, editors, and others who must identify and deal with acronyms.
