American Horizons is the only U.S. History survey text that presents the traditional narrative in a global context. The seven-author team uses the frequent movement of people, goods, and ideas into, out of, and within America's borders as a framework. This unique approach provides a fully integrated global perspective that seamlessly contextualizes American events within the wider world. The authors, all acclaimed scholars in their specialties, use their individual strengths to provide students with a balanced and inclusive account of U.S. history. Presented in two volumes for maximum flexibility, American Horizons illustrates the relevance of U.S. history to American students by centering on the matrix of issues that dominate their lives. These touchstone themes include population movements and growth, the evolving definition of citizenship, cultural change and continuity, people's relationship to and impact upon the environment, political and ideological contests and their consequences, and Americans' five centuries of engagement with regional, national, and global institutions, forces, and events. In addition, this beautifully designed, full-color book features hundreds of photos and images and more than one hundred maps. American Horizons contains ample pedagogy, including: * America in the World, visual guides to the key interactions between America and the world * Global Passages, which feature unique stories connecting America to the world * Visual Reviews providing post-reading summaries to help students to connect key themes or events within a chapter * Maps and Infographics that explore essential themes in new ways

Engineers need to "sell" engineering projects and products to managers, executives, and customers economically as well as technologically, environmentally, aesthetically, and so on. Principles of Engineering Economic Analysis, 6e teaches engineers to properly and methodically evaluate their work on an economic basis, and to convey it effectively to those who have the power to say "yea" or "nay." The 6th edition is updated and expanded to be comprehensive and flexible - it includes all standard topics plus stronger coverage of more advanced analysis techniques than other books (e.g., risk analysis, sensitivity analysis, cost estimating, public sector economics, capital budgeting, etc.), with the most thorough integration and guidance for spreadsheet use. The text provides a unified treatment of economic analysis principles and techniques from a cash flow perspective, a proven classroom approach that is very successful in practice. Chapter-opening stories about well-known companies, engineering and personal finance examples throughout the text, and external web resources help motivate students. FE-Like problems at the end of each chapter give students practice with the kinds of problems they'll encounter on the FE exam. The 6th edition provides students and instructors the latest tax information, and up-to-date company and industry information in the chapter opening stories, reflecting changes resulting from the recent tumult in the economy, so that students can work with the most current and relevant information.

'Lost Horizon' is a 1933 novel by English writer James Hilton. It is best remembered as the origin of Shangri-La, a fictional utopian lamasery high in the mountains of Tibet. While attempting to escape a civil war, four people are kidnapped and transported to the Tibetan mountains. After their plane crashes, they are found by a mysterious Chinese man. He leads them to a monastery hidden in "the valley of the blue moon" -- a land of mystery and matchless beauty where life is lived in tranquil wonder, beyond the grasp of a doomed world.
