The Best Grammar Workbook Ever! Penguin Instant Wall Street Journal Bestseller! Congratulations, you're a manager! After you pop the champagne, accept the shiny new title, and step into this thrilling next chapter of your career, the truth descends like a fog: you don't really know what you're doing. That's exactly how Julie Zhuo felt when she became a rookie manager at the age of 25. She stared at a long list of logistics--from hiring to firing, from meeting to messaging, from planning to pitching--and faced a thousand questions and uncertainties. How was she supposed to spin teamwork into value? How could she be a good steward of her reports' careers? What was the secret to leading with confidence in new and unexpected situations? Now, having managed dozens of teams spanning tens to

hundreds of people, Julie knows the most important lesson of all: great managers are made, not born. If you care enough to be reading this, then you care enough to be a great manager. *The Making of a Manager* is a modern field guide packed everyday examples and transformative insights, including: \* How to tell a great manager from an average manager (illustrations included) \* When you should look past an awkward interview and hire someone anyway \* How to build trust with your reports through not being a boss \* Where to look when you lose faith and lack the answers Whether you're new to the job, a veteran leader, or looking to be promoted, this is the handbook you need to be the kind of manager you wish you had.

**#1 NEW YORK TIMES BESTSELLER** • Bren é Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she ' s showing us how to put those ideas into practice so we can step up and lead. Don ' t miss the five-part HBO Max docuseries Bren é Brown: Atlas of the Heart! **NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG** Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don ' t pretend to have the right answers; we stay

curious and ask the right questions. We don ' t see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don ' t avoid difficult conversations and situations; we lean into vulnerability when it ' s necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we ' re choosing not to invest in developing the hearts and minds of leaders at the exact same time as we ' re scrambling to figure out what we have to offer that machines and AI can ' t do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling

---

author Bren é Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, “ One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It ’ s learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It ’ s why we ’ re here. ” Whether you ’ ve read *Daring Greatly* and *Rising Strong* or you ’ re new to Bren é Brown ’ s work, this book is for anyone who wants to step up and into brave leadership.

What is history and why should we study it? Is there such a thing as

---

historical truth? Is history a science? One of the most accomplished historians at work today, John Lewis Gaddis, answers these and other questions in this short, witty, and humane book. The Landscape of History provides a searching look at the historian's craft, as well as a strong argument for why a historical consciousness should matter to us today. Gaddis points out that while the historical method is more sophisticated than most historians realize, it doesn't require unintelligible prose to explain. Like cartographers mapping landscapes, historians represent what they can never replicate. In doing so, they combine the techniques of artists, geologists, paleontologists, and evolutionary biologists. Their approaches parallel, in intriguing ways, the new sciences of chaos, complexity, and criticality. They don't much resemble what happens in the social sciences, where the pursuit of independent variables functioning with static systems seems increasingly divorced from the world as we know it. So who's really being scientific and who isn't? This question too is one Gaddis explores, in ways that are certain to spark interdisciplinary controversy. Written in the tradition of Marc Bloch and E.H. Carr, The Landscape of History is at once an engaging introduction to the historical method for beginners, a powerful reaffirmation

---

of it for practitioners, a startling challenge to social scientists, and an effective skewering of post-modernist claims that we can't know anything at all about the past. It will be essential reading for anyone who reads, writes, teaches, or cares about history.

Exploring Mathematics gives students experience with doing mathematics - interrogating mathematical claims, exploring definitions, forming conjectures, attempting proofs, and presenting results - and engages them with examples, exercises, and projects that pique their interest. Written with a minimal number of pre-requisites, this text can be used by college students in their first and second years of study, and by independent readers who want an accessible introduction to theoretical mathematics. Core topics include proof techniques, sets, functions, relations, and cardinality, with selected additional topics that provide many possibilities for further exploration. With a problem-based

approach to investigating the material, students develop interesting examples and theorems through numerous exercises and projects. In-text exercises, with complete solutions or robust hints included in an appendix, help students explore and master the topics being presented. The end-of-chapter exercises and projects provide students with opportunities to confirm their understanding of core material, learn new concepts, and develop mathematical creativity.

The Making of a Manager Hudson Hills New Horizons is a four-level upper secondary course that sets achievable

goals and builds confidence. New Horizons includes 100% new content and updated exam training to prepare students for the B1 school-leaving exam. A wide range of topics engage teenagers' interest and provide essential vocabulary. Practical grammar exercises then build students' confidence in communication. The Everything Kids' Learning French Book OUP Oxford Teach Your Children the Importance of Home. "On a hill, there stood a tree. He felt lonely and bored and wanted to break free. "I wish I could fly up in the sky and see the world from above- from this place, I want to flee." When a magic swallow helps him to drag out his roots and fly, he finds himself up in the sky, looking down to the earth. What will he

---

find, what will he see? And finally: Will he fly back home where he belongs? A vivid story about the importance of home and the place we love the most. For all children ages 3-7. The Book includes EXTRA pics to color.

Horizons National Geographic  
Dr. Greg Zacharias, former Chief Scientist of the United States Air Force (2015-18), explores next steps in autonomous systems (AS) development, fielding, and training. Rapid advances in AS development and artificial intelligence (AI) research will change how we think about machines, whether they are individual vehicle platforms or networked enterprises. The payoff will be considerable, affording the US military significant protection for aviators, greater

effectiveness in employment, and unlimited opportunities for novel and disruptive concepts of operations. Autonomous Horizons: The Way Forward identifies issues and makes recommendations for the Air Force to take full advantage of this transformational technology.
