Life, The Invisible Life of Addie LaRue is New York Times bestselling author V. E. Schwab’s genre-

defying tour de force. A Life No One Will Remember. A Story You Will Never Forget. France, 1714: in

a moment of desperation, a young woman makes a Faustian bargain to live forever—and is cursed to be

forgotten by everyone she meets. Thus begins the extraordinary life of Addie LaRue, and a dazzling

adventure that will play out across centuries and continents, across history and art, as a young woman

learns how far she will go to leave her mark on the world. But everything changes when, after nearly 300

years, Addie stumbles across a young man in a hidden bookstore and he remembers her name. Also by

#1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it

means to dare greatly, rise strong, and brave the wilderness. Now, based on

new research conducted with leaders, change makers, and culture shifters,

she’s showing us how to put those ideas into practice so we can step up and

lead. Don’t miss the five-part HBO Max docuseries Brené Brown: Atlas of the

Heart! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG

Leadership is not about titles, status, and wielding power. A leader is anyone

who takes responsibility for recognizing the potential in people and ideas, and

has the courage to develop that potential. When we dare to lead, we don’t

pretend to have the right answers; we stay curious and ask the right questions.

We don’t see power as finite and hoard it; we know that power becomes

infinite when we share it with others. We don’t avoid difficult conversations

and situations; we lean into vulnerability when it’s necessary to do good work.

But daring leadership in a culture defined by scarcity, fear, and uncertainty

requires skill-building around traits that are deeply and uniquely human. The

irony is that we’re choosing not to invest in developing the hearts and minds of

leaders at the exact same time as we’re scrambling to figure out what we have

to offer that machines and AI can’t do better and faster. What can we do

better? Empathy, connection, and courage, to start. Four-time #1 New York

Times bestselling author Brené Brown has spent the past two decades

studying the emotions and experiences that give meaning to our lives, and the

past seven years working with transformative leaders and teams spanning the

globe. She found that leaders in organizations ranging from small

entrepreneurial startups and family-owned businesses to nonprofits, civic

organizations, and Fortune 50 companies all ask the same question: How do

you cultivate braver, more daring leaders, and how do you embed the value of

courage in your culture? In this new book, Brown uses research, stories, and

examples to answer these questions in the no-BS style that millions of readers

have come to expect and love. Brown writes, “One of the most important

findings of my career is that daring leadership is a collection of four skill sets

that are 100 percent teachable, observable, and measurable. It’s learning and

unlearning that requires brave work, tough conversations, and showing up with

your whole heart. Easy? No. Because choosing courage over comfort is not

always our default. Worth it? Always. We want to be brave with our lives and

our work. It’s why we’re here.” Whether you’ve read Daring Greatly and

Rising Strong or you’re new to Brené Brown’s work, this book is for anyone

who wants to step up and into brave leadership.

Exploring Mathematics gives students experience with doing mathematics - interrogating mathematical claims, exploring definitions, forming conjectures, attempting proofs, and presenting results - and engages them with examples, exercises, and projects that pique their interest. Written with a minimal number of pre-requisites, this text can be used by college students in their first and second years of study, and by independent readers who want an accessible introduction to theoretical mathematics. Core topics include proof techniques, sets, functions, relations, and cardinality, with selected additional topics that provide many possibilities for further exploration. With a problem-based approach to investigating the material, students develop interesting examples and theorems through numerous exercises and projects. In-text exercises, with complete solutions or robust hints included in an appendix, help students explore and master the topics being presented. The end-of-chapter exercises and projects provide students with opportunities to confirm their understanding of core material, learn new concepts, and develop mathematical creativity.

Horizons, Grade 4 Farrar, Straus and Giroux

What is history and why should we study it? Is there such a thing as historical truth? Is history a science? One of the most accomplished historians at work today, John Lewis Gaddis, answers these and other questions in this short, witty, and humane book. *The Landscape of History* provides a searching look at the historian's craft, as well as a strong argument for why a historical consciousness should matter to us today. Gaddis points out that while the historical method is more sophisticated than most historians realize, it doesn't require unintelligible prose to explain. Like cartographers mapping landscapes, historians represent what they can never replicate. In doing so, they combine the techniques of artists, geologists, paleontologists, and evolutionary biologists. Their approaches parallel, in intriguing ways, the new sciences of chaos, complexity, and criticality. They don't much resemble what happens in the social sciences, where the pursuit of independent variables functioning with static systems seems increasingly divorced from the world as we know it. So who's really being scientific and who isn't? This question too is one Gaddis explores, in ways that are certain to spark interdisciplinary controversy. Written in the tradition of Marc Bloch and E.H. Carr, *The Landscape of History* is at once an engaging introduction to the historical method for beginners, a powerful reaffirmation of it for practitioners, a startling challenge to social scientists, and an effective skewering of post-modernist claims that we can't know anything at all about the past. It will be essential reading for anyone who reads, writes, teaches, or cares about history.
